1. Record Nr. UNINA9910557499703321 Autore Pour Amin Beiranvand Titolo Multispectral and Hyperspectral Remote Sensing Data for Mineral **Exploration and Environmental Monitoring of Mined Areas** Pubbl/distr/stampa Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2021 1 online resource (416 p.) Descrizione fisica Soggetti Geography Research & information: general Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Sommario/riassunto In recent decades, remote sensing technology has been incorporated in numerous mineral exploration projects in metallogenic provinces around the world. Multispectral and hyperspectral sensors play a significant role in affording unique data for mineral exploration and environmental hazard monitoring. This book covers the advances of remote sensing data processing algorithms in mineral exploration, and the technology can be used in monitoring and decision-making in relation to environmental mining hazard. This book presents state-ofthe-art approaches on recent remote sensing and GIS-based mineral prospectivity modeling, offering excellent information to professional

mining companies.

earth scientists, researchers, mineral exploration communities and
