

1. Record Nr.	UNINA9910557571403321
Autore	Ornella Robutti
Titolo	Geometria tra realtà e teoria : proposte per un curriculum verticale // a cura di: Ornella Robutti
Pubbl/distr/stampa	Ledizioni, 2015 Italy : , : Ledizioni LediPublishing, , 2015
Descrizione fisica	1 online resource (ix, 150 pages) : illustrations
Soggetti	Geometry Mathematics Physical Sciences & Mathematics
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This volume collects part of the work carried out during the first year of the II level Master's Degree "Trainer Profession in Mathematics Education", organized by the University of Turin, Faculty of Mathematics. In particular it collects the reflection works and the didactic proposals that the various groups have developed during the course of Geometry held by Professor Ornella Robutti. Three activities M@t.abel (The master tree, The clock and Let's explore flat figures) are analyzed, proposing for each of the adaptations to different school orders, some reflections on the evaluation and INVALSI in particular. The content of this book is centered on a laboratory approach to Geometry and is intended for all teachers who intend to experiment with our proposals.
