1. Record Nr. UNINA9910557581803321 Autore Tang Qiuhong Titolo Remote Sensing of the Terrestrial Hydrologic Cycle Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Pubbl/distr/stampa Institute, 2020 Descrizione fisica 1 electronic resource (260 p.) Soggetti Research & information: general Geography Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia This book provides a practical introduction to remote sensing Sommario/riassunto applications for detecting changes in the terrestrial water cycle and understanding the causes and consequences of these changes. Covering a wide range of innovative remote sensing approaches for hydrological study, this book contributes significantly to the knowledge base of hydrology in the Anthropocene, i.e., global change hydrology. It is an excellent reference for students and professionals in the fields of

hydrology, climate change, and geography.
