

1. Record Nr.	UNINA9910557620803321
Autore	Gulati Karan
Titolo	Nano-Engineering Solutions for Dental Implant Applications
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (168 p.)
Soggetti	History of engineering and technology Technology: general issues
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Nano-engineering offers unique solutions for biomedical implants to meet compromised patient conditions via enhanced bioactivity and local drug release. This book presents the cutting-edge nano-engineered dental implant solutions that has the potential to ensure long-term success of dental implants while maintaining clinical translatability. From surface modification of titanium/zirconium dental implants to advanced therapeutic enhancements to treat infection and poor integration, this book advances the field of dental implant nano-engineering, showcasing current trends and future directions.</p>
