

1. Record Nr.	UNINA9910557621603321
Autore	Saramak Daniel
Titolo	Advanced Techniques and Efficiency Assessment of Mechanical Processing
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 electronic resource (128 p.)
Soggetti	Technology: general issues History of engineering & technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Mechanical processing is just one step in the value chain of metal production, but to some extent it determines an effectiveness of separation through suitable preparation of the raw material for beneficiation processes through production of required particle size composition and useful mineral liberation. The issue is mostly related to techniques of comminution and size classification, but it also concerns methods of gravity separation, as well as modeling and optimization. Technological and economic assessment supplements the issue.
