1. Record Nr. UNINA9910557622003321 Autore Courbebaisse Marie Titolo Vitamin D in 2020 : Stop or Not Yet? Pubbl/distr/stampa Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020 Descrizione fisica 1 electronic resource (166 p.) Soggetti Humanities Social interaction Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Many things have been said and written on the skeletal and non-Sommario/riassunto skeletal effects of vitamin D, but the largest recent interventional studies are generally negative. How should we thus position ourselves in 2020? Should we say "stop" or "not yet"? Indeed, the aging of the population, as well as new challenges and discoveries, is still triggering interest in this old molecule. In this Special Edition of Nutrients, we invited top experts to give their opinion on this important debate. We also encouraged scientists to submit their latest research on nutritional requirements in the general population and in high-risk groups, as well as treatment strategies, epidemiology, analytical updates and new devices for vitamin D measurement and the effect of vitamin D on bone and extra-skeletal health. As readers will see, this Special Issue reinforces the high prevalence of vitamin deficiency and insufficiency in

> the general population and supports the safety of this low-cost molecule, revealing new perspectives regarding the extra-skeletal

effects of vitamin D.
