

1. Record Nr.	UNINA9910702283303321
Titolo	Corona star catchers [[electronic resource]] : interviews with the Air Force Aerial Recovery Flight Crews of the 6593d Test Squadron (Special), 1958-1972 / / edited by Robert D. Mulcahy, Jr
Pubbl/distr/stampa	Chantilly, Va. : , : Center for the Study of National Reconnaissance, National Reconnaissance Office, , [2012]
Descrizione fisica	1 online resource (x, 258 pages) : color illustrations
Altri autori (Persone)	MulcahyRobert D., Jr.
Soggetti	Aerial reconnaissance, American - History Artificial satellites - Recovery Cold War Military intelligence - United States - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"June 2012." Title from title screen (viewed on Oct. 17, 2012).
Nota di bibliografia	Includes bibliographical references (pages 253-255) and index.

2. Record Nr.	UNINA9910557632003321
Autore	Santangelo Nicoletta
Titolo	Geoheritage and Geotourism Resources
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 online resource (362 p.)
Soggetti	Earth sciences, geography, environment, planning Research & information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This Special Issue outlines the role of geoheritage and geotourism as potential touristic resources of a region. The term "geoheritage" refers to a particular type of natural resources represented by sites of special geological significance, rarity or beauty that are representative of a region and of its geological history, events, and processes. These sites are also known as "geosites" and, as well as archaeological, architectonic, and historical sites, can be considered as part of the cultural estate of a country. "Geotourism" is an emerging type of sustainable tourism, which concentrates on geosites, focusing on visitor knowledge, environmental education, and amusement.</p> <p>Geotourism may be very useful for geological sciences divulgation and may provide additional opportunities for the development of rural areas, generally not included among the main touristic attractions. The collected papers focused on these main topics with different methods and approaches and can be grouped as follows: i) papers dealing with geosite promotion and valorization in protected areas; ii) papers dealing with geosite promotion and valorization in non-protected areas; iii) papers dealing with geosite promotion by exhibition, remote sensing analysis, and apps; iv) papers investigating geotourism and geoheritage from tourists' perspectives.</p>
