Livello bibliografico	Monografia

2. Record Nr.	UNINA9910557688803321
Autore	Tomás Matus José
Titolo	Ome-wide Studies of Grapevine Fruit Composition and Responses to the Environment in the Era of Systems Biology
Pubbl/distr/stampa	Frontiers Media SA, 2019
Descrizione fisica	1 online resource (423 p.)
Soggetti	Botany and plant sciences Science: general issues
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: frontiersin.org/about/contact

3. Record Nr.	UNINA9910253924903321
Titolo	Biobanking of Human Biospecimens : Principles and Practice // edited by Pierre Hainaut, Jim Vaught, Kurt Zatloukal, Markus Pasterk
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-55120-5
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XII, 239 p. 20 illus., 16 illus. in color.)
Disciplina	610.724
Soggetti	Diagnosis, Laboratory Laboratory Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.

Sommario/riassunto

This volume is the first comprehensive text on human biobanking, authored by scientists and regulatory officers who have led the field over the past 10 years. It covers biobanking issues and its importance in advancing the field of research in cancer, cardiovascular, metabolic, and other diseases. Biobanks of human specimens have become the cornerstone for research on human health that harnesses the power of “omics” technologies to identify biomarkers for disease susceptibility. Biobanks are an essential component of the development of personalized medicine, which relies on the molecular analysis of biospecimens that are truly representative of individuals and of diseases. Over the past decade, biobanking has been the focus of major investments and developments aimed at developing appropriate infrastructure, methods, networking practice and evidence-based pre-analytical procedures. This volume explores topics including specimen storage, protocol design, specimen collection, pre-analytical processing and preservation, long-term storage, retrieval and separation, and distribution to analytical laboratory platforms. These activities are extremely complex and are essential for biomedical and biotechnological developments and this text provides critical information about biobanking for the development of future forms of medicine.
