Sommario/riassunto	The Special Issue "Experimental and Clinical Treatment of Subarachnoid Hemorrhage after the Rupture of Saccular Intracranial Aneurysms" provides an excellent insight into the many facets of aneurysmal subarachnoid hemorrhage. It includes three original papers, three reviews, two case reports and one technical note. This book represents a compilation of important clinical and preclinical papers by innovative researchers that enhance our understanding of subarachnoid hemorrhage and intracranial aneurysms.
