

1. Record Nr.	UNINA9910557752303321
Autore	Balogh Kata
Titolo	Bridging Formal and Conceptual Semantics : Selected papers of BRIDGE-14 // Kata Balogh, Wiebke Petersen
Pubbl/distr/stampa	De Gruyter, 2017 Düsseldorf : , : düsseldorf university press, , [2017] ©2017
ISBN	9783110720327 3110720329
Edizione	[1st ed.]
Descrizione fisica	1 online resource (210 p.)
Collana	Studies in Language and Cognition ; ; 4
Disciplina	410
Soggetti	LANGUAGE ARTS & DISCIPLINES / General Conference papers and proceedings.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Frontmatter -- Table of Contents -- Preface -- Live Meanings -- University of Amsterdam ILLC/Department of Philosophy -- Dependencies, semantic constraints and conceptual closeness in a dynamic frame theory -- What Cost Naturalism? -- Measuring out the relation between formal and conceptual semantics -- Representing the Lexicon: Identifying Meaning in Use via Overspecification -- Russian predicates selecting remarkable clauses: Corpus-based approach and Gricean Perspective
Sommario/riassunto	The articles in this volume are the outcome of the successful BRIDGE Workshop held in Düsseldorf in 2014. The workshop gathered a number of distinguished researchers from formal semantics and conceptual semantics and aimed to initiate a deeper conversation and collaboration instead of separating the two sides as competing views. The workshop provided a platform to further discuss parallelisms on specific semantic issues on the one hand and on the other hand to confront opposed claims from the two different perspectives. This volume represents a selected number of high-quality papers presented at the workshop featuring various approaches to meaning from linguistics, logic and philosophy of language. This series explores

issues of mental representation, linguistic structure and representation, and their interplay. The research presented in this series is grounded in the idea explored in the Collaborative Research Center 'The structure of representations in language, cognition and science' (SFB 991) that there is a universal format for the representation of linguistic and cognitive concepts.
