

1. Record Nr.	UNINA9910557760503321
Autore	Aletta Francesco
Titolo	Promoting Healthy and Supportive Acoustic Environments: Going beyond the Quietness
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 electronic resource (334 p.)
Soggetti	Humanities Social interaction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This book gathers 14 original contributions published in an IJERPH Special Issue that deal with the perception of environmental sounds and how such sounds are likely to affect human quality of life and well-being and the experience of a place. The research focus over the years has been gradually shifting from treating sound simply as “noise” and something that cities should get rid of to a potential “resource” to promote and support community life in public spaces. Three main topics or “needs” to be addressed by researchers and practitioners emerged from this Special Issue: (1) the need to re-think “quietness” in cities as something that goes beyond the mere “pursuit of silence”, (2) the need to integrate additional contextual factors in the characterization and management of urban acoustic environments for public health, and (3) the need to consider the acoustic quality of indoor spaces as opposed to an outdoor-only perspective. The contributions collected in this book will hopefully trigger new questions and inform the agenda of future researchers and practitioners in the environmental acoustics domain.</p>
