1. Record Nr.   UNINA9910557789403321

   Autore   Nanni Loris

   Titolo   Biometric Systems

   Pubbl/distr/stampa   Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing
                        Institute, 2021

   Descrizione fisica   1 online resource (352 p.)

   Soggetti   Technology: general issues

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Sommario/riassunto   Because of the accelerating progress in biometrics research and the
                        latest nation-state threats to security, this book's publication is not
                        only timely but also much needed. This volume contains seventeen
                        peer-reviewed chapters reporting the state of the art in biometrics
                        research: security issues, signature verification, fingerprint
                        identification, wrist vascular biometrics, ear detection, face detection
                        and identification (including a new survey of face recognition), person
                        re-identification, electrocardiogram (ECT) recognition, and several
                        multi-modal systems. This book will be a valuable resource for
                        graduate students, engineers, and researchers interested in
                        understanding and investigating this important field of study.
