

1. Record Nr.	UNINA9910557798103321
Autore	Rewald Boris
Titolo	Woody Plants and Forest Ecosystems in a Complex World – Ecological Interactions and Physiological Functioning Above and Below Ground
Pubbl/distr/stampa	Frontiers Media SA, 2020
Descrizione fisica	1 electronic resource (228 p.)
Soggetti	Science: general issues Botany & plant sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	In this Research Topic, we aim to provide a snapshot of the state-of-the-art of the fields of forest and tree ecology and physiology above and below ground, including forest soils and their microbial communities, with a special focus on plant ecophysiology, (soil) biodiversity, ecosystem functioning, as well as the effects of disturbances, (a-)biotic stresses, and biological invasions.
