Sommario/riassunto	The instruments of qualitative methodology are certainly one of the 20th century's greatest achievements among the different research methods in the humanities and social sciences, especially among those that deal with the discourse and world view of the other – the informant, his or her verbal, visual and other messages. In this period several important reflections on the forms and limits of research practice took place: reflections on the informant and the images and theories of the world with which he or she lives and co-creates his or her life~on the ways and means of recording and translating statements or field information into a language that is understandable to academic circles and the interested public~and last but not least, reflections on the researcher's world view with and through which he or she interprets and attempts to understand the culture of the other. Med razlinimi raziskovalnimi metodami na podroju raziskovanja družbenih in humanistinih ved, posebej tistih, ki imajo opraviti z govorico in s podobo sveta drugega – informatorja, njegovih verbalnih, vizualnih in drugih sporoil, je razpoložljivi instrumentarij kvalitativne metodologije gotovo eden najpomembnejših dosežkov 20. stoletja. V tem obdobju so se zgodili pomembni premisleki o oblikah terenskega dela in njegovih mejah~o informatorju in podobah, teorijah sveta, s

katerimi tako ali drugače živi in so-ustvarja svoje življenje~o oblikah zapisovanja, prevajanja povedanega ali na terenu sporenega v govorico, razumljivo krogu raziskovalcev in zainteresirane javnosti~in konno o raziskovalevih podobah sveta, s katerimi bere in skuša razumeti kulture drugega. Nekatera teh vprašanj so obravnavana v priuioi knjigi o kvalitativnem raziskovanju.
