

1. Record Nr.	UNINA9910557866403321
Titolo	Zeleno je dobro : nacrtovanje urbanih zelenih površin z ljudmi, ne za ljudi // [avtorji] Martin Pogacar [and 5 others ; prevod Tadej Turnsek]
Pubbl/distr/stampa	Ljubljana, : ZRC SAZU, Založba ZRC, 2019
Descrizione fisica	1 electronic resource (64 p.)
Soggetti	Urban & municipal planning
Lingua di pubblicazione	Sloveno
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This toolkit has been developed during the implementation of Urban Green Belts (UGB) project (Interreg, Central Europe) which main objective was to improve planning, management and decision-making capacities of the public sector related to urban green spaces, thus creating integrated sustainable UGS planning and management systems. Special attention was given to functional urban areas (FUA), a functional economic unit characterised by densely inhabited "urban cores" and "hinterlands" whose labour market is highly integrated with the cores. Following a comparative situation analysis, the partners jointly designed innovative methods and tools to facilitate sustainable UGS management. Presented toolkit has been primarily developed as a Model for a Community Involvement. The presented methods and tools for community building were tested in three pilot studies conducted in Maribor (Slovenia), Krakow (Poland), and Budapest (Hungary).</p> <p>Prirnik je bil izdelan med izvajanjem projekta Urbane zelene površine (UGB) v okviru programa Interreg, Srednja Evropa, katerega glavni cilj je bil izboljšati zmogljivosti javnega sektorja na področju nartovanja, upravljanja in odloanja, povezanega z urbaniimi zelenimi površinami (UZP), ter na ta nain ustvariti celostne trajnostne sisteme za nartovanje in upravljanje UZP. Posebna pozornost je bila namenjena funkcionalnim urbanim obmojem (FUO), funkcionalnim ekonomskim enotam, za katere so znailna gosto poseljena »urbana jedra« in »zaledja«, v katerih je trg dela mono povezan z jedri. Na podlagi</p>

primerjalne analize stanja so projektni partnerji skupaj zasnovali inovativne metode in orodja za spodbujanje trajnostnega upravljanja UZP. Predstavljeni prironik je bil razvit predvsem kot model za vkljuevanje skupnosti. Predstavljene metode in orodja za izgradnjo skupnosti so bile preizkušene znotraj treh pilotnih obmoji, opravljenih v Mariboru (Slovenija), Krakovu (Poljska) in Budimpešti (Madžarska).
