Autore	Boudrioua Azzedine
Titolo	An introduction to organic lasers / / Azzedine Boudrioua, Mahmoud Chakaroun, Alexis Fischer
Pubbl/distr/stampa	London, England ; ; Oxford, England : , : ISTE Press : , : Elsevier, , 2017 ©2017
ISBN	0-08-101072-9 1-78548-158-4
Descrizione fisica	1 online resource (228 pages) : illustrations, tables
Disciplina	621.366
Soggetti	Lasers Organic electronics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Organic semiconductors -- Organic light-emitting diodes -- Organic lasers -- Organic plasmonics : toward organic nanolasers.
Sommario/riassunto	"One of the biggest challenges of organic optoelectronics is the realization of the first organic laser diode (electrically pumped) which has a very strong potential for many applications. Similar to what happened in the field of inorganic optoelectronics when transforming LEDs into LDs, the race is on to transform an OLED into an OLD. This involves the development of innovative solutions to overcome the difficulties inherent in organic materials and the electric pump. This book presents the elements of physics, materials and technologies that allow us to understand the basics of organic lasers and to capture the progress made. It also provides guidance for future developments towards the organic laser diode."--
