#### Sommario/riassunto

Career brings together individuals' paths through life, learning and work. It describes how people interface with social institutions including the education system, employers, civil society and the state. Because our careers are socially and culturally embedded it matters where they are enacted. Career and Career Guidance in the Nordic Countries explores what kind of context the Nordic region offers for the pursuit of career, how the development of careers are supported in welfare societies, and how career guidance is enacted in this context. The Nordic region encompasses an area in Northern Europe and the Northern Atlantic comprising Denmark, Sweden, Norway as well as Finland to the east and Iceland in the Atlantic. It includes also the self-governing areas of Aland, Greenland and the Faroe Islands. This region has long been seen as a source of progressive policy innovation in education and employment and this book focuses and explores the place, the enactment and the theories of career guidance in these Nordic countries.

Sommario/riassunto	<p>À l'évidence, les sportifs sont aujourd'hui de plus en plus nombreux à pratiquer en dehors des clubs. Cette forme d'organisation caractéristique qu'est le club, inventée à la fin du xixe siècle, perfectionnée et diffusée tout au long du xx<sup>e</sup> siècle, est-elle vouée à disparaître progressivement ? Critiqué par tous ceux et celles qui n'ont pas pu - ou pas su - trouver leur place en son sein, le club sportif est-il encore une solution d'avenir pour le développement de l'activité sportive ? Traduit-il les aspirations d'une majorité de pratiquants sportifs ? Reste-t-il un lieu privilégié pour accéder au plus haut niveau de compétition ? Les responsables de l'Université Sportive d'Été entendaient relever le défi. Un autre club sportif pour le xx<sup>e</sup> siècle ? Telle est l'interrogation générale à laquelle les participants de FUSE 1997, qui s'est tenue à Nîmes du 29 août au 2 septembre 1997, avec le soutien du Sport Université Nîmois, se sont efforcés d'apporter des éléments de réponse sans pour autant ni éluder, ni mésestimer les contradictions qui caractérisent actuellement le sport. Sans doute n'est-elle pas aisée la tâche qui consiste pour les acteurs des clubs à dégager pour les années à venir une ligne de conduite à la fois cohérente et efficace. Faire cohabiter pratique traditionnelle et formes d'activités nouvelles... Favoriser l'accueil et la cohabitation de pratiquants aux attentes variées... Concilier un individualisme croissant et un besoin retrouvé de sociabilité, la gratuité de l'effort et le mercenariat, la fidélité à des valeurs anciennes et l'adaptation à de nouvelles normes de pratique... Ou bien le club sportif des prochaines décennies saura recomposer une synthèse cohérente entre les valeurs, des missions et la sollicitation des publics ou il ne sera pas !</p>
