

1. Record Nr.	UNINA9910558486203321
Titolo	Proceedings of the fourth international technical symposium on deepwater oil and gas engineering // edited by Baojiang Sun [and four others]
Pubbl/distr/stampa	Gateway East, Singapore : , : Springer, , [2022] ©2022
ISBN	981-19-0960-1
Descrizione fisica	1 online resource (423 pages)
Collana	Lecture Notes in Civil Engineering ; ; v.246
Disciplina	665.5
Soggetti	Petroleum engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Organization -- Conference Committee -- Chairs -- Members (Alphabet Sequence) -- Youth Forum on Gas Hydrate Committee -- Chairs -- Members (Alphabet Sequence) -- Scientific Committee -- Chairs -- Members (Alphabet Sequence) -- Publication Committee -- Chairs -- Contents -- Deepwater Drilling and Completion -- Prospects of Special Ocean Engineering Equipment Application in Chinese Marine NGH Trial Production -- 1 Introduction -- 2 Floating Body -- 2.1 Applications in Existed Marine NGH Trial Production Cases -- 2.2 Technology and Development Directions -- 3 Underwater Devices -- 3.1 Remote Operated Vehicle -- 3.2 Seabed Mining Vehicle -- 4 Conclusions -- References -- Analysis of Influence of Hydrate Decomposition on Underwater Wellhead Stability -- 1 Introduction -- 2 Numerical Model of Effect of Hydrate Decomposition on Underwater Wellhead Stability -- 3 Evolution of Underwater Wellhead Stability with Drilling Time -- 4 Conclusion -- References -- Study on Collapse Strength of Sand Control Screen Pipe with Corrosion Defect Under External Pressure -- 1 Introduction -- 2 Finite Element Model Established -- 2.1 Assumptions -- 2.2 Loads and Boundary Conditions -- 2.3 Material Parameters of Screen Pipe -- 3 FEM Results -- 4 Parametric Analysis -- 4.1 The Influence of Corrosion Defects Location on Collapsing Strength of Screen Pipe -- 4.2 The Influence of Corrosion Defect Depth on the Collapsing Strength of Screen Pipe --

4.3 The Influence of Corrosion Defect Width on the Collapsing Strength of Screen Pipe -- 4.4 The Influence of Corrosion Defect Length on the Collapsing Strength of Screen Pipe -- 4.5 Effect of Hole Arrangement Parameters on Collapsing Strength of Screen Pipe -- 5 Conclusion -- References -- Prospects of Horizontal Well Drilling in Marine Gas Hydrate Reservoir -- 1 Introduction. 2 Horizontal Well Drilling Technology -- 2.1 Conventional Horizontal Well Drilling Technology -- 2.2 Shallow Horizontal Well Drilling -- 2.3 Methane Hydrate Drilling Technology -- 3 Drilling-Related Challenge -- 3.1 The Ability to Control Dogleg Severity -- 3.2 Reservoir Mechanical Properties are Unstable -- 3.3 Wellhead Stability -- 3.4 Wellbore Instability -- 3.5 High Probability of Geological Hazards -- 4 Prospects for Horizontal Drilling Technology in Submarine Hydrate Layer -- 4.1 Hydro Jet Radial Drilling -- 4.2 Wellhead Steering Technology -- 4.3 Surface Conductor Jet Drilling Technology -- 4.4 Dynamic Kill Drilling Technology -- 4.5 Optimize the Drilling Fluid -- 5 Concluding Remarks -- References -- Research on Numerical Simulation of Wellbore Stability of Natural Gas Hydrate Reservoir Considering Dynamic Drilling Process -- 1 Introduction -- 2 Wellbore-Reservoir Coupling Heat and Mass Transfer Model -- 2.1 Heat and Mass Transfer Model of the Fluid Flow in the Wellbore -- 2.2 Heat and Mass Transfer Model of the Fluid Flow in the NGH Formation -- 2.3 Wellbore Stability Model of NGH Reservoir -- 3 Simulation Results and Discussion -- 3.1 Basic Parameters -- 3.2 Simulation Results -- 4 Conclusion -- References -- Experimental Study on Strength Characteristics of Hydrate Argillaceous Siltstone Under Immersion of Drilling Fluid -- 1 Introduction -- 2 Rock Sample Preparation and Experimental Methods -- 2.1 Sample Preparation -- 2.2 Experimental Method -- 3 Experimental Results and Discussion -- 3.1 Calculation Method of Rock Mechanical Parameters -- 3.2 Variation of Mechanical Parameters of Argillaceous Siltstone Immersed in Drilling Fluid -- 4 Conclusion -- References -- Integrity Evaluation Method of Completion Screen in Deepwater Gas Reservoirs with High Temperature and High Pressure -- 1 Introduction -- 2 Framework -- 3 Simulation Method. 3.1 Accuracy Change of Screen -- 3.2 Screen Clogging and Sand Retaining -- 3.3 Screen Corrosion -- 3.4 Screen Erosion -- 4 Evaluation System -- 4.1 Comprehensive Simulation for Screen at Well Bottom -- 4.2 Evaluation Index and Grade Division -- 5 Application -- 6 Conclusion -- References -- Study on Throttling Characteristics of Hydraulic Cylinder Throttle Valve and Control Strategies for MPD -- 1 Introduction -- 2 Experimental Section -- 2.1 Equipment and Materials -- 2.2 Experimental Scheme and Process -- 3 Experimental Results and Discussion -- 3.1 Analysis on the Experiment of Throttling Characteristics with Drilling fluid's Different Displacements in Pure Liquid Flow -- 3.2 Analysis on the Experiment of Throttling Characteristics with Drilling fluid's Different Displacements in Gas-Liquid Two-Phase Flow -- 3.3 Analysis on the Experiment of Throttling Characteristics with Different Initial Void Fractions in Gas-Liquid Two-Phase Flow -- 4 Pressure Control Strategies of Hydraulic Cylinder Throttle Valve -- 5 Conclusion -- References -- Estimation of Formation Parameters Based on Void Fraction Measurement Outside Riser in Deepwater Drilling -- 1 Introduction -- 2 Calculation of Gas-Liquid Two Phase Flow -- 2.1 Gas-Liquid Two Phase Flow Model -- 2.2 Calculation of Gas Void Fraction -- 3 Gas Void Fraction Measurement -- 4 Formation Parameter Prediction -- 4.1 Prediction Method -- 4.2 Identifying the Formation Parameters -- 4.3 Case Study -- 5 Conclusion -- References -- Natural

Gas Hydrate Production -- Visual Experimental Study on Hydrate
Dissociation in Porous Media -- 1 Introduction -- 2 Experimental
Section -- 2.1 Materials and Apparatus -- 2.2 Experimental Procedures
-- 3 Experimental Results and Discussion -- 3.1 A Certain Amount
of Free Gas and Free Water in Pores Before Hydrate Dissociation.
3.2 Hydrate Dissociation at Different High Phase Saturation -- 4
Conclusion -- References -- Numerical Simulation of Combined
Depressurization Production of Natural Gas Hydrate and Shallow Gas --
1 Introduction -- 2 Numerical Simulation of Combined
Depressurization Production of NGH and Shallow Gas -- 2.1
Coexistence Mode of NGH and Shallow Gas -- 2.2 Model of Numerical
Simulation -- 2.3 Numerical Simulation Scheme Design -- 3 Results
and Discussion -- 3.1 Gas Production Performance of Combined
Production Under Different Coexistence Modes -- 3.2 Influencing
Factors of Gas Production Dynamics -- 4 Conclusion -- References --
Numerical Simulation on Sensitivity of Related Parameters for Hydrate
Dissociation by Depressurization -- 1 Introduction -- 2 Methodology
-- 2.1 Mathematical Model -- 2.2 Initial Values and Boundary
Conditions -- 2.3 Finite Difference and Discrete Solution -- 3 Model
Validation -- 4 Simulation Results -- 4.1 Intrinsic Permeability -- 4.2
Initial Porosity -- 4.3 Initial Hydrate Saturation -- 5 Conclusion --
References -- Numerical Investigation on Dissociation Performance
of Natural Gas Hydrate in Reservoirs by Depressurization -- 1
Introduction -- 2 Numerical Model -- 2.1 Governing Equations -- 2.2
Model Descriptions -- 2.3 Initial and Boundary Conditions -- 3 Results
and Discussions -- 3.1 Description of Specimens -- 3.2 Variation
of Hydrate, Gas, and Water Saturation -- 3.3 Hydrate Dissociation Front
-- 4 Conclusion -- References -- The Facilitative Behaviors
of Underlying Gas Toward Hydrate-Bearing Sediment Formation
and Dissociation -- 1 Introduction -- 2 Experimental Section -- 2.1
Materials -- 2.2 Apparatus -- 2.3 Experimental Steps -- 3
Experimental Results and Discussion -- 3.1 The Formation of Methane
Hydrate with the Underlying Gas -- 3.2 The Dissociation of Methane
Hydrate with the Underlying Gas -- 4 Conclusion.
References -- The Investigation of Efficiency During the Exploitation
of Gas Hydrates by Depressurization -- 1 Introduction -- 2 Numerical
Modeling -- 3 Simulation Results and Discussion -- 3.1 Governing
Mechanisms -- 3.2 Two Distinct Processes -- 4 Conclusion --
References -- Gas Hydrate Exploitation Technology by Mixed Gas
Replacement -- 1 Introduction -- 2 CO₂ and N₂/H₂ Gas Mixture
Replacement Exploiting -- 2.1 Replacement Mechanism -- 2.2
Technology Development -- 3 Sweep of N₂/H₂ -- 4 Conclusion
and Outlook -- References -- Experimental Study on Methane Hydrate
Formation and Dissociation in the Sediments of South China Sea -- 1
Introduction -- 2 Experimental Section -- 2.1 Materials and Apparatus
-- 2.2 Experimental Procedure -- 3 Experimental Results
and Discussion -- 3.1 Temperature and Pressure Characteristics
of Reservoir Decomposition of Underlying Gas Hydrates -- 3.2 Effect
of Underlying Gas on Decompression Rate of Hydrate Reservoir -- 3.3
Depressurization and Decomposition of Hydrate Formation Under
Different Pressure Methods -- 4 Conclusion -- References --
Numerical Simulation of Producing Natural Gas Hydrate by Air Injection
-- 1 Introduction -- 2 Numerical Simulation -- 2.1 Model Construction
-- 2.2 Model Parameters -- 3 Results and Discussion -- 3.1 Gas
Production and Water Production Law -- 3.2 Hydrate Saturation
Variation Law -- 4 Conclusion -- References -- Numerical Study
of Reservoir Stability in Depressurized Exploitation of Natural Gas
Hydrate Reservoir -- 1 Introduction -- 2 Mathematical Model -- 2.1

Reaction Kinetics Equations of Hydrate -- 2.2 Energy Conservation
Equations -- 2.3 Mass Balance Equations -- 2.4 Solid Mechanics
Equations -- 3 Experimental Results and Discussion -- 3.1 Geometry
Model Description -- 3.2 Initial Conditions -- 4 Results and Discussion
-- 5 Conclusions -- References.
Numerical Simulation of the Mining of Heterogeneous Hydrate Reservoir
Considering Formation Sand Production and Subsidence.
