transitioning from adolescence to adulthood with autism and the attendant ethical, legal and social issues for the individual as well as caregivers and professionals. It features experts in a variety of areas (law, bioethics, philosophy, pediatrics, neurology, medicine, psychology, special education, social work, employment, civic participation, social media) who provide commentary on these areas and the relevant ethical/legal/social challenges young autistic adults face in these different areas. This is an indispensable read for educators, therapists, and other professionals who work in transition with young autistic adults.
