Sommario/riassunto	This book ist intended as a guide for those who wish to learn a language which is important for comparative Slavik studies (in order to facilitate subsequent study of more than one of the Slavik languages, just as Latin facilitates study of the Romance languages), for an understanding of the Church Slavik element of Russian (as important as the Latin element in English), or for comparative Indo-European studies. The approach taken ist hat of generative grammar, which provides for the most cohesive and precise formulation of the principles of a language, enabling the student to learn the language from the inside out.
