

1. Record Nr.	UNINA9910563075703321
Autore	Collings David <1959->
Titolo	Stolen future, broken present : the human significance of climate change // David A. Collings
Pubbl/distr/stampa	Ann Arbor, Michigan : , : Open Humanities Press, , 2014 ©2014
ISBN	9781607853145
Edizione	[First edition.]
Descrizione fisica	1 online resource (241 pages) : digital, PDF file(s)
Collana	Critical Climate Change
Soggetti	Human beings - Effect of climate on Climatic changes - Social aspects Climatic changes - Political aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Climate change will happen to you -- What we could do -- Time's up -- The impossible revolution -- The stolen future -- The ruins to come -- The broken present -- A slow and endless horror -- Infinite responsibility -- Making reparation: offset your life -- Bear no children -- The god of the whirlwind.
Sommario/riassunto	"This book argues that climate change has a devastating effect on how we think about the future. Once several positive feedback loops in Earth's dynamic systems, such as the melting of the Arctic icecap or the drying of the Amazon, cross the point of no return, the biosphere is likely to undergo severe and irreversible warming. Nearly everything we do is premised on the assumption that the world we know will endure into the future and provide a sustaining context for our activities. But today the future of a viable biosphere, and thus the purpose of our present activities, is put into question. A disappearing future leads to a broken present, a strange incoherence in the feel of everyday life. We thus face the unprecedented challenge of salvaging a basis for our lives today. That basis, this book argues, may be found in our capacity to assume an infinite responsibility for ecological disaster and, like the biblical Job, to respond with awe to the alien voice that speaks from the whirlwind. By owning disaster and accepting our small place within the

inhuman forces of the biosphere, we may discover how to live with responsibility and serenity whatever may come."--Publisher's description
