Sommario/riassunto

This book constitutes the refereed proceedings of the 9th International Conference on Scalable Uncertainty Management, SUM 2015, held in Québec City, QC, Canada, in September 2015. The 25 regular papers and 3 short papers were carefully reviewed and selected from 49 submissions. The call for papers for SUM 2015 solicited submissions in all areas of managing and reasoning with substantial and complex kinds of uncertain, incomplete or inconsistent information. These include applications in decision support systems, risk analysis, machine learning, belief networks, logics of uncertainty, belief revision and update, argumentation, negotiation technologies, semantic web applications, search engines, ontology systems, information fusion, information retrieval, natural language processing, information extraction, image recognition, vision systems, data and text mining, and the consideration of issues such as provenance, trust, heterogeneity, and complexity of data and knowledge.

Sommario/riassunto	<p>This book deals with the changing patterns of transmission of land and houses in a pre-industrial rural community of Southern Bohemia. By linking different sources, such as land registers and a family reconstitution, the study focuses on both the demographic and the economic factors that influenced peasant transmission strategies as well as on the consequences of changing transmission patterns for access to land-ownership.</p> <p>Die vorliegende Fallstudie untersucht die Weitergabe von Haus und Grundbesitz zwischen den Generationen und die daraus resultierenden Folgen für die demographische, ökonomische und gesellschaftliche Entwicklung vormoderner Gesellschaften. Erst im lokalen Kontext lassen sich die Widersprüche der bisherigen Forschung in Bezug auf den postulierten Zusammenhang zwischen Besitzwechsel und sozialer</p>

Polarisierung auflösen und der gesellschaftliche Wandel auf einer neuen Grundlage erklären.
