

1. Record Nr.	UNINA9910780688003321
Autore	Storrs Monica
Titolo	Companions of the Peace : diaries and letters of Monica Storrs, 1931-1939 // edited by Vera K. Fast ; with an introduction by Vera K. Fast and Mary Kinnear
Pubbl/distr/stampa	Toronto, [Ontario] ; ; Buffalo, [New York] ; ; London, [England] : , : University of Toronto Press, , 1999 ©1999
ISBN	1-282-03724-2 9786612037245 1-4426-7316-8
Descrizione fisica	1 online resource (263 p.)
Disciplina	971.18703092
Soggetti	Frontier and pioneer life - Peace River Valley (B.C. and Alta.) Pioneers - Peace River Valley (B.C. and Alta.) Women pioneers - Peace River Valley (B.C. and Alta.) Personal correspondence Diaries. Biographies. Electronic books. Peace River Valley (B.C. and Alta.) Social life and customs
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents -- Acknowledgments -- Introduction -- Diaries and Letters, 1931a€?1939 -- Postscript -- Notes -- Photo Credits -- Index -- A -- B -- C -- D -- E -- F -- G -- H -- I -- J -- K -- L -- M -- N -- O -- P -- R -- S -- T -- U -- V -- W -- Map -- Illustrations
Sommario/riassunto	"In 1929 a cultured English gentlewoman arrived in the barely settled wilderness of northern British Columbia as an Anglican missionary, intending to assuage her sense of duty by staying for one year. She stayed for twenty-one. The years covered by Monica Storrs's journal entries (1931-9) were at times unbearably hard, the depression compounding what was already a demanding existence. She and the

group of women she lived with, the Companions of the Peace, were sent out as 'missionaries of empire.' As the journals progress, Storrs's droll British wit persists but her imperialistic attitude softens as her work draws her into the lives around her. Expanding on the initial mandate to start Sunday schools, foster contact with women, and perform church services, she became involved in assembling libraries, lending money for seed grain, financing medical assistance, and organizing theatrical performances and poetry contests. After her death even the non-British inhabitants of the Peace River district described her as 'one of us.'--Jacket

2. Record Nr.	UNINA9910245748203321
Titolo	Neurobiology of sleep and circadian rhythms

Autore	Butler Merlin G
Titolo	Identification and Characterization of Genetic Components in Autism Spectrum Disorders 2020
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (204 p.)
Soggetti	Biology, life sciences Genetics (non-medical) Research & information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The Identification of the Genetic Components of Autism Spectrum Disorders 2020 will be a useful resource for laboratory and clinical scientists, translational-based researchers, primary healthcare providers and physicians, psychologists/psychiatrists, neurologists, developmental pediatricians, clinical geneticists, teachers, special educators, and caregivers involved with individuals who have autism spectrum disorders (ASD), with the goal to translate information directly to the clinical, education and home settings. Other professionals, students at all levels, and families who are interested in this important neurodevelopmental disorder will find this textbook of value by obtaining a better awareness of the causes, testing, and understanding of genetic components leading to autism, and research that may open avenues for treatment with new approaches. This textbook includes nine chapters divided into three sections (clinical, genetics, other) written by experts in the field dedicated to genetics research and clinical care, description, and treatment by generating reviews for ASD and related disorders. These chapters include information on discoveries, risk factors, causation, diagnosis, treatment, and phenotyping with characterization of genomic or genetic factors and the environment, as genetics play an important role

in up to 90% of individuals with autism via over 800 currently
recognized genes.
