| Autore | Long Kathryn <1950-> |
| Titolo | The revival of 1857-58 [[electronic resource] ] : interpreting an American religious awakening / / Kathryn Teresa Long |
| Pubbl/distr/stampa | New York, : Oxford University Press, c1998 |
| ISBN | 1-280-45374-5<br>0-19-535453-2<br>0-585-21573-1 |
| Descrizione fisica | 1 online resource (273 p.) |
| Collana | Religion in America series |
| Disciplina | 277.3/081 |
| Soggetti | Prayer Meeting Revival (1857-1858)<br>Electronic books.<br>United States Church history 19th century |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | "The Frank S. and Elizabeth D. Brewer prize essay of the American Society of Church History." |
| Nota di bibliografia | Includes bibliographical references (p. 221-239) and index. |
| Nota di contenuto | Contents; Introduction; ONE: ""Prayer-Meetings . . . in all parts of the land"": The Revival Takes Shape as History; TWO: ""Affording public amusement . . . [and] gratifying the curiosity"": Revivalism in the News; THREE: The Influence of Family, Church, and Association: Personal Perspectives on the Revival; FOUR: A ""Desire . . . that the ladies would keep away"": Gender Tensions and the Masculinization of Urban Piety; FIVE: ""Great Revival"" or ""Great Reformation""? The Privatization of Northern Revivalism<br>SIX: ""Where is the evidence of your revival of religion?"" Critiques of the Revival's Social Impact SEVEN: Legacies of 1857-58: D. L. Moody and the ""Revival Generation""; Appendix A: Chronology of Selected Dates and Events; Appendix B: Membership Statistics and Church Growth Rates, 1853-61; Notes; Selected Bibliography; Index |
| Sommario/riassunto | The Revival of 1857-58 was a widespread religious awakening, most famous for urban prayer meetings in major metropolitan centres across the United States. This is a critical analysis of the revival which has often been overshadowed by earlier ""great awakenings"". |

| Livello bibliografico | Monografia |
| Sommario/riassunto | Protein adsorption to solids, nanomaterials, and biological surfaces is of central interest in many fields, including biomedicine, bioanalytical chemistry, materials engineering, bio-nanotechnology, and basic biomolecular research. Although protein adsorption may sometimes occur with little consequence on molecular structure, interactions with surfaces frequently cause changes in local or global conformations and dynamics, perturbations to secondary structures or tertiary folds, eventually resulting in dramatically altered protein function. Importantly, surfaces may trigger protein misfolding and self-aggregation, or, conversely, promote protein structure formation. The use of nanoscale surfaces to remodel the conformational landscape and the aggregation pathways of amyloidogenic peptides and proteins has been proposed as a promising strategy against several severe human diseases. The rapid growth of applications and technological innovation which is based on or concerned with protein adsorption necessitates renewed efforts to provide molecular-level insights into adsorption-induced protein structural perturbations. In this Special Issue, we gathered the recent findings of experimental and computational investigations that contributed novel insights into protein adsorption with a focus on the structural and dynamic aspects of proteins. |
