1. Record Nr. UNISA990000949650203316

Autore	STANLEY, Louis T.
Titolo	A history of golf / Louis T. Stanley
Pubbl/distr/stampa	London : Weidenfels and Nicolson, c1991
ISBN	0-297-81155-X
Descrizione fisica	218 p. : ill. ; 24 cm
Disciplina	796.352
Soggetti	Golf - Storia
Collocazione	II.5. 3342(XV B 521)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr. UNINA9910566466503321

Autore	Andreoni Francesca
Titolo	Carbapenemase-Producing Enterobacterales
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (304 p.)
Soggetti	Biology, life sciences Microbiology (non-medical) Research and information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Carbapenem-resistant Enterobacterales (CRE) are a common cause of infections in both community and healthcare settings and have become

an increasing threat to public health worldwide. The focus of this Special Issue includes aspects concerning plasmid-mediated antimicrobial resistance along with other carbapenem resistance mechanisms. Understanding the prevalence and routes of transmission of CRE is important in developing specific interventions for healthcare facilities, as well as the general impact of CRE circulation on the environment. Attention has also been focused on carbapenemase testing in order to provide advanced phenotypic and molecular assays for the identification of CRE, as a valid tool for active global surveillance, and from this perspective, the study of resistance mechanisms can provide significant support for the development of new and appropriate antimicrobial molecules. For all of these reasons, the phenomenon of carbapenem resistance deserves more attention, for the sake of public health.
