

1. Record Nr.	UNINA9910450151003321
Autore	Owens Judith <1955->
Titolo	Enabling engagements [[electronic resource]] : Edmund Spenser and the poetics of patronage // Judith Owens
Pubbl/distr/stampa	Montreal ; ; Ithaca, : McGill-Queen's University Press, c2002
ISBN	1-282-86024-0 9786612860249 0-7735-6997-9
Descrizione fisica	1 online resource (195 p.)
Disciplina	821/.3
Soggetti	Authors and patrons - England - History - 16th century Literary patrons - Great Britain Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references: p. [163]-175 and index.

2. Record Nr.	UNINA9910566471403321
Autore	Ohana Mickaël
Titolo	Cardiovascular and Thoracic Imaging: Trends, Perspectives and Prospects
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 electronic resource (130 p.)
Soggetti	Medical equipment & techniques
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Radiology is evolving at a fast pace, and the specific field of cardiovascular and thoracic imaging is no stranger to that trend. While it could, at first, seem unusual to gather these two specialties in a common Issue, the very fact that many of us are trained and exercise in both is more than a hint to the common grounds these fields are sharing. From the ever-increasing role of artificial intelligence in the reconstruction, segmentation, and analysis of images to the quest of functionality derived from anatomy, their interplay is big, and one innovation developed with the former in mind could prove useful for the latter. If the coronavirus disease 2019 (COVID-19) pandemic has shed light on the decisive diagnostic role of chest CT and, to a lesser extent, cardiac MR, one must not forget the major advances and extensive researches made possible in other areas by these techniques in the past years. With this Issue, we aim at encouraging and wish to bring to light state-of-the-art reviews, novel original researches, and ongoing discussions on the multiple aspects of cardiovascular and chest imaging.</p>
