Titolo	Lifestyle and Chronic Pain
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (248 p.)
Soggetti	Chemistry Research and information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Cumulating evidence shows that lifestyle factors such as physical (in) activity, stress, poor sleep, unhealthy diet, and smoking are associated with chronic pain severity and sustainment across all age categories. A paradigm shift from a tissue- and disease-based approach towards individually tailored multimodal lifestyle interventions should lead to improved outcomes and decrease the psychological and socioeconomic burden of chronic pain. Such an approach fits well into the global move towards precision pain medicine for patients with chronic pain. For these reasons, this book is dedicated to <i>Lifestyle and Chronic Pain</i> .
