

1. Record Nr.	UNINA9910566693903321
Titolo	Systems biogeochemistry of major marine biomes // edited by Aninda Mazumdar
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , [2022] ©2022
ISBN	1-119-55435-7 1-119-55437-3
Descrizione fisica	1 online resource (333 pages)
Disciplina	577.14
Soggetti	Biogeochemistry Chemical oceanography Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- List of Contributors -- Preface -- Biome I Continental Margins -- 1 Biogeochemistry of Marine Oxygen Minimum Zones with Special Emphasis on the Northern Indian Ocean -- 1.1 Introduction -- 1.1.1 The Arabian Sea Oxygen Minimum Zone -- 1.1.2 The Bay of Bengal Oxygen Minimum Zone -- 1.2 Preservation of Organic matter and Sediment Biogeochemistry -- 1.3 Pore Fluid Geochemistry -- 1.4 Sedimentary Sulfidization and Sulfurization -- 1.5 Benthic Biology -- 1.6 Microbial Metabolism in the Marine Oxygen Minimum Zone Water Column and Sediment -- 1.7 Nitrogen Metabolism in the Marine Marine Oxygen Minimum Zone Water Column -- 1.8 Microbiological Perspective of Sulfur Metabolism in the Marine Oxygen Minimum Zone Water Column -- 1.9 Microbiology of Methane Cycling in the Oxygen Minimum Zone Water Column -- 1.10 Microbial Metabolism in Marine Oxygen Minimum Zone Sediments -- 1.11 Oxygen Minimum Zone expansion -- 1.12 Conclusion -- Acknowledgment -- References -- 2 Sedimentary Records of Present and Past Marine Sulfur Cycling -- 2.1. Introduction -- 2.2. Stable Sulfur Isotopes - a Tool for Reconstructing Spatial and Temporal Changes in Sulfur Cycling -- 2.3. The Modern

Marine Realm -- 2.4. Oceanic Sulfate and its Evolution Through Time -- 2.5. Pyrite and Organic-Bound Sulfur as Recorders of Microbial Sulfur Cycling in the Past -- 2.6. Mass-Independently Fractionated Sulfur Isotopes - a record of Earth's Oxygenation -- 2.7. Summary and Direction of Future Research -- Acknowledgments -- References -- 3 The Role of Microorganisms in Iron Reduction in Marine Sediments -- 3.1. INTRODUCTION -- 3.2. THE REDOX ZONES IN SHALLOW MARINE SEDIMENTS -- 3.3. BIOCHEMICAL PATHWAYS OF IRON REDUCTION -- 3.3.1. The Specificity of Microbial Pathways with Respect to Iron -- 3.3.2. Microbial Strategies to Reduce Solid Iron Phases. 3.3.3. Uptake of Iron as a Nutrient -- 3.4. DIVERSITY OF POTENTIAL IRON-REDUCING AND IRON-OXIDIZING ORGANISMS -- 3.4.1. Correlation of Phylogenetic Abundances with Porewater Chemistry Data -- 3.4.2. Diversity of Iron Reducers in Suboxic Zones -- 3.4.3. Methanogenic Zones -- 3.4.4. The Phylogenetic Tree of Marine Iron Reducers -- 3.5. SUMMARY AND CONCLUSIONS -- References -- 4 Biogeochemistry of Nitrogen in the Marine System with Special Emphasis on the Arabian Sea and Bay of Bengal -- 4.1 Introduction -- 4.2 Sources of Nitrogen for the Ocean -- 4.2.1 Riverine and Groundwater Input -- 4.2.2 Atmospheric Deposition -- 4.2.3 Volcanic Input -- 4.2.4 Marine Upwelling -- 4.3 Marine Nitrogen Biogeochemistry -- 4.3.1 Biological Nitrogen Fixation -- 4.3.2 Nitrogen Assimilation -- 4.3.3 Nitrification -- 4.3.4 Denitrification -- 4.3.5 Ammonium Production in the Marine Realm -- 4.3.6 Dissimilatory Nitrate Reduction to Ammonia -- 4.3.7 Anammox -- 4.3.8 Nitrate/Nitrite-Dependent Anaerobic Methane Oxidation -- 4.4. N-cycle in Marine Sediments -- 4.4.1 Nitrogen Fixation in Sediments -- 4.4.2 Nitrification in Marine Sediments -- 4.4.3 Denitrification in Marine Sediments -- 4.4.4 Anammox in Marine Sediments -- 4.4.5 Dissimilatory Nitrate Reduction to Ammonia In Marine Sediments -- 4.5 Nitrogen Cycling in the Northern Indian Ocean -- 4.5.1 Pelagic Nitrogen Cycle in Oxygen Minimum Zones -- 4.5.2 Sedimentary Denitrification and Anammox Rates in the Arabian Sea -- 4.6 Nitrogen isotopic values in sinking particulates -- 4.6.1 ¹⁵N in Marine Sediments from the Arabian Sea and Bay of Bengal -- 4.7 Summary -- Acknowledgement -- References -- 5 Organic Carbon in Sediments of the Western Indian Margin -- 5.1. Introduction -- 5.2. Organic Matter and Organic Carbon -- 5.3. Organic Carbon Distribution in the World Ocean and the Arabian Sea. 5.4. Methods Adopted to Determine OC in the Arabian Sea -- 5.5. Processes Responsible for Primary Productivity and Transport of Organic Carbon -- 5.6. Oxygen Minimum Zone and Organic Carbon -- 5.7. Studies Carried out on Organic Carbon from the Western Margin of India -- 5.7.1. Particulate/Dissolved Organic Carbon from the Water Column -- 5.7.2. Organic Carbon in Surface Sediments -- 5.7.3. Variations in Organic Carbon in the Sediment Cores -- 5.7.4. Early Diagenesis of Organic Matter and the Sedimentary Environment -- 5.8. Summary and Future Work -- Acknowledgement -- References -- Biome II Ocean Depths -- 6 Deep Subsurface Microbiomes of the Marine Realm -- 6.1. INTRODUCTION -- 6.2. ECOSYSTEM CONSTRAINTS IN THE MARINE DEEP SUBSURFACE -- 6.3. FACTORS CONSTRAINING THE STUDY OF MARINE DEEP SUBSURFACES -- 6.4. BIOGEOCHEMISTRY OF MARINE DEEP SUBSURFACES -- 6.4.1. Major Sites of Exploration and Their Geological Contexts -- 6.4.2. Geomicrobiology of Marine Deep Subsurfaces -- 6.4.3. Geomicrobiology of Marine Subsurfaces > 5 mbsf -- 6.5. SUMMING UP THE GEOMICROBIOLOGY OF THE MARINE DEEP SUBSURFACE -- 6.6. ULTRASLOW METABOLISM AND SUSTAINABILITY

OF DEEP LIFE: IMPLICATIONS FOR EVOLUTION AND ASTROBIOLOGY --
REFERENCES -- 7 Biogeochemistry of Marine Petroleum Systems -- 7.1.
INTRODUCTION -- 7.2. FORMATION OF OIL RESERVOIRS -- 7.3.
ECOSYSTEM CONSTRAINTS AND HABITABILITY OF PETROLEUM BASINS
-- 7.4. MICROBIOME FRAMEWORK OF PETROLEUM RESERVOIRS -- 7.5.
MICROBIAL COMMUNITY STRUCTURES AND FUNCTIONS IN MARINE OIL
RESERVOIRS -- 7.5.1. Anaerobic Breakdown of Hydrocarbons
and Fermentation -- 7.5.2. Methanogenesis -- 7.5.3. Sulfate Reduction
-- 7.6. SUMMARY VIEW OF THE POTENTIAL NETWORK
OF BIOGEOCHEMICAL PROCESSES IN OFFSHORE OIL RESERVOIRS -- 7.7.
EFFECTS OF BIODEGRADATION ON PETROLEUM PROPERTIES.
7.8. DELETERIOUS MICROBIAL ACTIVITIES: HYDROGEN SULFIDE
PRODUCTION (SOURING) AND ITS REMEDIATION WITH NITRATE -- 7.9.
IN SITU MICROBIAL PROCESSES BENEFICIAL TO OIL RECOVERY -- 7.10.
CONCLUDING REMARKS -- ACKNOWLEDGEMENTS -- REFERENCES --
Biome III Polar Oceans -- 8 Biogeochemical Processes in the Arctic
Ocean -- 8.1. Introduction -- 8.2. The Arctic Ocean and its
Biogeochemistry -- 8.3. Response of the Arctic Ocean and Arctic Fjords
to Climate Change -- 8.4. Biochemical Effects of Glacial Discharge
on Marine Resources -- 8.5. Effect of Biochemical Changes on Primary
and Secondary Production -- 8.6. Arctic Permafrost -- 8.6.1
Biogeochemistry and Significance of Arctic Permafrost -- 8.6.2 Impact
of Thawing Permafrost on Arctic Environment -- 8.7. Summary
and Future Perspectives -- Acknowledgements -- References -- 9
Biogeochemistry and Ecology of the Indian Sector of the Southern Ocean
-- 9.1. Introduction -- 9.2. Role of Currents and Oceanic Fronts in the
Southern Ocean -- 9.3. Nutrients in the Southern Ocean -- 9.4.
Southern Ocean Plankton Ecology -- 9.5. Ocean Carbonate Chemistry
-- 9.6. Sea Ice and Implications for Future Global Change -- 9.7.
Summary -- Acknowledgements -- References -- 10 Benthic Biome
of the Southern Ocean: Present State of Knowledge and Future
Perspectives -- 10.1 Introduction -- 10.2 Biogeochemistry of the
Southern Ocean -- 10.2.1 The High-Nutrient Low-Chlorophyll Zone
and Productivity -- 10.2.2 Antarctic Circumpolar Current -- 10.2.3
Carbon Immobilization and Benthic Carbon Flux -- 10.2.4 Retreat
of Sea Ice and Benthic Blue Carbon -- 10.3 Benthic Ecoregions
and Biodiversity -- 10.3.1 Meiobenthos -- 10.3.2 Macrobenthos --
10.3.3 Megabenthos -- 10.3.4 Functional Types -- 10.4 Evolutionary
Setting and Unique Trait Modalities -- 10.5 Biotic interaction -- 10.6
Dispersal and Endemism -- 10.7 Climate Change and Benthos.
10.8 Conservation and Future Perspectives -- 10.9 Conclusions --
Acknowledgments -- References -- 11 Biogeochemistry of the
Antarctic Coasts: Implications for Biodiversity and Climate Change --
11.1 Introduction -- 11.2 Biogeochemical Cycles on the Antarctic Coast
-- 11.3 Antarctic Coastal Features in the Context of Biogeochemistry
and Climate Change -- 11.3.1 Sea Ice -- 11.3.2 Coastal Polynyas --
11.3.3 Fast Ice -- 11.3.4 Ice Shelves -- 11.3.5 Ice Sheets -- 11.4
Interlink Between Biogeochemical Cycles and Climate Change -- 11.5
Floral and microbial diversity of Antarctica: Distribution
and Implications for Climate Change -- 11.5.1 Diversity of Bacteria
and Archaea -- 11.5.2 Diversity of Fungi -- 11.5.3 Diversity of Lichens
-- 11.5.4 Diversity of Cyanobacteria -- 11.5.5 Diversity of Seaweeds --
11.5.6 Diversity of Snow Algae -- 11.6 Climate Change and its Effect
on Algal Biodiversity -- 11.7 Summary -- Acknowledgment --
References -- Biome IV Extreme Environments -- 12 Geomicrobiology
at a Physicochemical Limit for Life: Deep-sea Hypersaline Anoxic Basins
-- 12.1. Introduction -- 12.2. Geographical and Geological Overview
of Deep-sea Hypersaline Anoxic Basins -- 12.3. Deep-sea Hypersaline

Anoxic Basins as Physicochemical Limits of the Earth's Biosphere --
12.4. Geomicrobial Dynamics in Deep-sea Hypersaline Anoxic Basins
Across the Global Ocean -- 12.4.1. Deep-sea Hypersaline Anoxic
Basins of the Mediterranean Sea -- 12.4.2. Deep-sea Hypersaline
Anoxic Basins of the Red Sea -- 12.4.3. Deep-sea Hypersaline Anoxic
Basins of the Gulf of Mexico -- 12.4.4. The Solitary Deep-sea
Hypersaline Anoxic Basin of the Black Sea -- 12.5. A Universal
Biogeochemical Framework for all Deep-sea Hypersaline Anoxic Basins
(and Other High-Entropy O₂-Scarce Marine Microbiomes?) -- 12.6.
Astrobiological Implications of Deep-sea Hypersaline Anoxic Basins --
References.
