

1. Record Nr.	UNINA9910567000303321
Titolo	Applied pharmaceutical practice and nutraceuticals : Natural Product Developments / edited by Debarshi Kar Mahapatra, Cristobal Noe Aguilar, A.K. Haghi
Pubbl/distr/stampa	Palm Bay, FL, : Apple Academic Press, , 2021
ISBN	9781771889247
Disciplina	615.19
Locazione	FFABC
Collocazione	80 547/IX 169
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>dal sito dell'editore: "Applied Pharmaceutical Practice and Nutraceuticals: Natural Product Developments showcases how pharmaceutical and nutraceutical compounds from natural products can be used to cure or prevent diseases. The chapters explore the connections between agrochemicals and pharmaceuticals and the use of plants and plant products in the formulation and development of new pharmaceuticals and nutraceuticals. The pharmaceutical industry recognizes the shift to the use of natural products while also considering the serious concerns that have arisen regarding the claimed efficacy, quality, and safety of these products. Chapters cover:</p> <p>The emerging perspectives of natural chalcone-based nitric acid inhibitors  The pharmacological properties of Emblicanin-A and Emblicanin-B constituents found in Phyllanthus emblica  The pathophysiology and various herbal drugs used for treating helminthiasis (or worm infections) and their pharmacological activities  Natural medicines that can be employed as diuretics  The utilization, safety, and therapeutic perspectives of medicinal plant for treating psoriasis and skin diseases  The role of nutrients and cofactors, dietary adjustments and gut anomalies, probiotics and prebiotics, phytochemicals, and ecological factors for evaluating the condition of proof in nutraceutical-based disease management practices  Beer as a major source of compounds associated with health benefits, which</p>

could possibly decrease the risks of cardiovascular disease The role of the media as an important source of health information to help with personal medical decisions, specifically regarding cancer The composition of *Artemisia herba-alba* and *Origanum majorana* essential oils is analyzed, and their antibacterial and antifungal activity How medicinal plants and herbs combined with some kinds of alcohol develop healing, stimulating, and aphrodisiac effects while others can cause adverse effects and allergies"
