

1. Record Nr.	UNINA9910568252303321
Autore	Zhang Jiazhong
Titolo	Dynamics and fault diagnosis on nonlinear rotors and impellers // Jiazhong Zhang
Pubbl/distr/stampa	Cham, Switzerland : , : Springer International Publishing, , [2022] ©2022
ISBN	9783030943011 9783030943004
Descrizione fisica	1 online resource (281 pages)
Collana	Nonlinear Systems and Complexity ; ; v.34
Disciplina	620.0044
Soggetti	Fault location (Engineering) Fault location (Engineering) - Automation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Contents -- 1 Periodic Motions to Chaos in a Nonlinear Rotor System -- 1.1 Introduction -- 1.2 Methodology -- 1.3 Bifurcation Trees -- 1.4 Numerical Simulation -- 1.5 Conclusions -- A. 1 Appendix -- References -- 2 Fault Diagnosis of Gear Rotor System Based on Collaborative Filtering Recommendation Method -- 2.1 Introduction -- 2.2 Adaptive Oversampling Technology and Multi-scale Entropy Analysis Method -- 2.2.1 Adaptive Oversampling Technology -- 2.2.2 Multi-scale Permutation Entropy -- 2.2.3 Wavelet Packet Energy Entropy -- 2.3 Construction Method of Feature-State Joint Scoring Matrix of Gear Failure -- 2.4 Recommended Diagnosis Method for Gear Fault Collaborative Filtering -- 2.5 Collaborative Filtering Recommended Gear Fault Diagnosis Model Fused with Multi-scale and Multi-domain Entropy -- 2.6 Experiment and Analysis of Gear Fault Diagnosis Cases -- 2.6.1 Gear Fault Diagnosis Experiment -- 2.6.2 Algorithm Verification and Analysis -- 2.6.3 Discussion of Algorithm Effect -- 2.7 Conclusion -- A.1 Appendix 1 -- B.1 Appendix 2 -- References -- 3 Study on Dynamic Behaviors of Rotor Model with Coupling Faults and Applications of TPOD Method -- 3.1 Introduction -- 3.2 Rotor Model with the Coupling Faults -- 3.3 Discussions on Dynamical Behaviors -- 3.3.1 Dynamical Behaviors -- 3.3.2 Effects of Systematic Parameters -- 3.3.2.1 Cracked Depth -- 3.3.2.2 Clearances

Between Rotor and Stator -- 3.3.2.3 Stator Stiffness -- 3.3.2.4  
Eccentricity -- 3.4 Optimal Reduced Model Based on POM Energy -- 3.5  
Efficiency of the Order Reduction Method -- 3.6 Conclusions -- A.1  
Appendix 1 -- B.1 Appendix 2 -- References -- 4 Nonlinear and Linear  
Phenomenon Investigation of Coupled Vibration of a Multi-disc Rotor  
Based on Multi-mistuned Blades Length or Multi-disordered Stagger  
Angle Blades -- 4.1 Introduction -- 4.2 Theoretical Analysis.  
4.3 Finite Element Methods -- 4.4 Numerical Results -- 4.5  
Conclusions -- A.1 Appendix: Matrices Elements -- References -- 5  
Lateral-Torsional-Coupled Model Based Dynamic Analyses of Spur  
Gears Under Time-Varying External Load Conditions with Surface Wear  
-- 5.1 Introduction -- 5.2 Dynamical Model -- 5.3 Numerical  
Simulation and Discussion -- 5.3.1 Effects of Wear on Meshing  
Stiffness and STE -- 5.3.2 Effects of Time-Varying External Loads and  
Surface Wear -- 5.3.2.1 Dynamic Characteristics of System Operates at  
 $n_1 = 800$  rpm -- 5.3.2.2 Dynamic Characteristics of System Operates  
at  $n_1 = 1860$  rpm -- 5.3.2.3 Dynamic Characteristics of System  
Operates at  $n_1 = 3720$  rpm -- 5.3.2.4 Comparisons of Dynamic  
Factor and Dominated Amplitudes -- 5.3.3 Parametric Analysis --  
5.3.3.1 Effects of Surface Wear Depth -- 5.3.3.2 Coupling Effects of  
Time-Varying Load and Gear Wear -- 5.4 Conclusions -- Appendix --  
References -- 6 Experimental and Numerical Studies on Compressor  
Nonlinear Behaviors with Inlet Distortion and Their Interaction -- 6.1  
Introduction -- 6.1.1 Experimental Investigations -- 6.1.2 Numerical  
Investigations Using CFD (Computational Fluid Dynamics) -- 6.2  
Experimental and Simulation Setups -- 6.2.1 Experimental Setups --  
6.2.2 Numerical Simulation -- 6.3 Results -- 6.3.1 Steady Part of Flat  
Baffle Distortion -- 6.3.2 Rotor Steady-State Performance with  
Distortion -- 6.3.3 Unsteady Part of Flat Baffle Distortion -- 6.3.4 Rotor  
Performances with Distortion -- 6.4 Conclusions and Outlook --  
References -- 7 Study on Mode Localization Induced by Material and  
Aerodynamic Mistunings in Impellers with Periodical and Cyclic  
Symmetry -- 7.1 Introduction -- 7.1.1 Background -- 7.1.2 State of  
the Art -- 7.2 Fundamental Theories of Vibration Localizations of  
Periodic Structures -- 7.2.1 Concept of Vibration Localization and Its  
Developments.  
7.2.2 Nature of Vibration Localization and Its Effects -- 7.2.3 Main  
Models of Vibration Localization -- 7.2.4 Main Analysis Methods -- 7.3  
Finite Element Method Combined with Materials Mistuning -- 7.3.1  
Finite Element Method to Model Material Mistuning -- 7.3.2 Mistuning  
from Aerodynamics -- 7.3.2.1 Stress Stiffening Effects -- 7.3.2.2  
Aerodynamics Effects -- 7.4 Influences of Material Mistuning on Mode  
Localization -- 7.4.1 Model of Material Mistuning of Impeller -- 7.4.1.1  
Meshing and 3D Model -- 7.4.1.2 Stochastic Distribution of Material  
Mistuning -- 7.4.1.3 Probability Statistical Distribution of Material  
Properties -- 7.4.2 Numerical Examples -- 7.4.2.1 Mode Analysis of  
Tuned Impeller -- 7.4.3 Mode Analysis of Mistuned Impeller -- 7.5  
Aerodynamic Mistuning and Vibration Localization -- 7.5.1 Analysis of  
Centrifugal Impeller with Aerodynamic Mistuning -- 7.5.1.1 Numerical  
Simulation of the Flow Field -- 7.5.1.2 Modal Analysis -- 7.5.2  
Relationship Between Degree of Localization and Average Aerodynamic  
Mistuning -- 7.6 Conclusion -- References -- 8 Fluid-Structure  
Interactions of a Perimeter-Reinforced Membrane Wing in Laminar  
Shear Flow -- 8.1 Introduction -- 8.2 Mechanical Model and  
Mathematical Formulation -- 8.3 Numerical Method -- 8.3.1 Flow  
Solver -- 8.3.2 Structure Solver -- 8.3.3 FSI Solution Procedure -- 8.4  
Numerical Results -- 8.4.1 Computational Model and Code Verification  
-- 8.4.2 Membrane Wing in Shear Flow -- 8.4.2.1 Aerodynamic

Performance -- 8.4.2.2 Structure Response -- 8.4.2.3 Flow Field -- 8.5  
Conclusions -- References -- 9 Periodic Motions and Bifurcations in a  
Double Pendulum -- 9.1 Introduction -- 9.2 Mechanical Model -- 9.3  
Periodic Motions and Stability -- 9.4 Period-1 to Period-4 Motions --  
9.5 Period-3 Motion -- 9.6 Conclusion -- Appendix -- References.  
10 Analytical Periodic Motions for a First-Order Nonlinear Circuit  
System Under Different Excitations -- 10.1 Introduction -- 10.2 First-  
Order Nonlinear Circuit Simulation Model -- 10.3 Analytical Solution of  
the First-Order Nonlinear Circuit -- 10.4 Characteristics of Numerical  
Model and Circuit Simulation Model -- 10.5 Output Response of the  
First-Order Nonlinear Circuit -- 10.6 Conclusions -- References -- 11  
Model Reduction on Approximate Inertial Manifolds for NS Equations  
through Multilevel Finite Element Method and Hierarchical Basis -- 11.1  
Introduction -- 11.2 Mathematical Modelling -- 11.2.1 Governing  
Equations -- 11.2.2 The Boundary Conditions -- 11.2.3 Existence of  
Inertial Manifolds -- 11.2.4 Multilevel Finite Element Method and Its  
Basis -- 11.3 Numerical Scheme for Navier-Stokes Equations -- 11.4  
Weak Form of Navier-Stokes Equation -- 11.4.1 Verification of  
Numerical Method -- 11.5 Numerical Results and Discussion -- 11.5.1  
Pressure Distribution Contours of NACA 0012 Airfoil -- 11.5.2  
Distributions of Pressure Coefficients of NACA 0012 Airfoil -- 11.5.3  
Comparisons of Computational Time -- 11.6 Conclusion -- References  
-- Index.
