

1. Record Nr.	UNINA9910568266203321
Autore	Mortad Mohammed Hichem <1978->
Titolo	Counterexamples in operator theory // Mohammed Hichem Mortad
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2022] ©2022
ISBN	9783030978143 9783030978136
Descrizione fisica	1 online resource (613 pages)
Disciplina	515.724
Soggetti	Operator theory Teoria d'operadors Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Preface -- Contents -- Part I Bounded Linear Operators -- 1 Some Basic Properties -- 1.1 Basics -- 1.2 Questions -- 1.2.1 Does the "Banachness" of $B(X, Y)$ Yield That of Y ? -- 1.2.2 An Operator A_0 with $A^2=0$ and So A^2 "026B30D "026B30D A"026B30D 2 -- 1.2.3 $A, B(H)$ with $ABAB=0$ but $BABA \neq 0$ -- 1.2.4 An Operator Commuting with Both $A+B$ and AB , But It Does Not Commute with Any of A and B -- 1.2.5 The Non-transitivity of the Relation of Commutativity -- 1.2.6 Two Operators A, B with $"026B30D AB-BA"$ $026B30D =2"026B30D A"026B30D "026B30D B"026B30D -- 1.2.7 Two$ Nilpotent Operators Such That Their Sum and Their Product Are Not Nilpotent -- 1.2.8 Two Non-nilpotent Operators Such That Their Sum and Their Product Are Nilpotent -- 1.2.9 An Invertible Operator A with $"026B30D A^{-1}026B30D 1/"026B30D A"026B30D -- 1.2.10 An AB(H)$ Such That $I-A$ Is Invertible and Yet $"026B30D A"026B30D 1 -- 1.2.11$ Two Non-invertible $A, B(H)$ Such That AB Is Invertible -- 1.2.12 Two $A,$ B Such That $A+B=AB$ but $ABBA \neq 0$ -- 1.2.13 Left (Resp. Right) Invertible Operators with Many Left (Resp. Right) Inverses -- 1.2.14 An Injective Operator That Is Not Left Invertible -- 1.2.15 An A_0 Such That $"426830A Ax, x"526930B =0$ for All $x \in H$ -- 1.2.16 The Open Mapping Theorem Fails to Hold True for Bilinear Mappings -- Answers -- 2 Basic

Classes of Bounded Linear Operators -- 2.1 Basics -- 2.2 Questions --
 2.2.1 A Non-unitary Isometry -- 2.2.2 A Nonnormal A Such That $\ker A = \ker A^*$ -- 2.2.3 Do Normal Operators A and B Satisfy $\|ABx\| = \|BAx\|$ for All x ? -- 2.2.4 Do Normal Operators A and B Satisfy $\|ABx\| = \|A^*B^*x\|$ for All x ? -- 2.2.5 Two Operators B and V Such That $\|BV\| = \|B\|$ Where V Is an Isometry -- 2.2.6 An Invertible Normal Operator That Is not Unitary.
 2.2.7 Two Self-Adjoint Operators Whose Product Is Not Even Normal -- 2.2.8 Two Normal Operators A, B Such That AB Is Normal, but $ABBA$ -- 2.2.9 Two Normal Operators Whose Sum Is Not Normal -- 2.2.10 Two Unitary U, V for Which $U+V$ Is Not Unitary -- 2.2.11 Two Anti-commuting Normal Operators Whose Sum Is Not Normal -- 2.2.12 Two Unitary Operators A and B Such That $AB, BA,$ and $A+B$ Are All Normal yet $ABBA$ -- 2.2.13 A Non-self-adjoint A Such That A^2 Is Self-Adjoint -- 2.2.14 Three Self-Adjoint Operators $A, B,$ and C Such That ABC Is Self-Adjoint, Yet No Two of $A, B,$ and C Need to Commute -- 2.2.15 An Orthogonal Projection P and a Normal A Such That PAP Is Not Normal -- 2.2.16 A Partial Isometry That Is Not an Isometry -- 2.2.17 A Non-partial Isometry V Such That V^2 Is a Partial Isometry -- 2.2.18 A Partial Isometry V Such That V^2 Is a Partial Isometry, but Neither V^3 Nor V^4 Is One -- 2.2.19 No Condition of $U=U^*, U^2=I$ and $U^*U=I$ Needs to Imply Any of the Other Two -- 2.2.20 A, B Such That $BB^*+B^*B=I$ and $B^2=B^*2=0$ -- 2.2.21 A Nonnormal Solution of $(A^*A)^2=A^*2A^2$ -- 2.2.22 An $AB(H)$ Such That $A_n=I, \text{ while } A_{n-1} \neq I, n \geq 2$ -- 2.2.23 A Unitary A Such That $A^n=I$ for All $n \in \mathbb{N}, n \geq 2$ -- 2.2.24 A Normal Non-self-adjoint Operator $AB(H)$ Such That $A^*A=A_n$ -- 2.2.25 A Nonnormal A Satisfying $A^*pAq=A_n$ -- Answers -- 3 Operator Topologies -- 3.1 Questions --
 3.1.1 Strong Convergence Does Not Imply Convergence in Norm, and Weak Convergence Does Not Entail Strong Convergence -- 3.1.2 $s\text{-}\lim_n A_n = A$ implies $\lim_n \|A_n\| = \|A\|$ -- 3.1.3 $(A, B)AB$ Is Not Weakly Continuous -- 3.1.4 The Uniform Limit of a Sequence of Invertible Operators -- 3.1.5 A Sequence of Self-adjoint Operators Such That None of Its Terms Commutes with the (Uniform) Limit of the Sequence -- 3.1.6 Strong (or Weak) Limit of Sequences of Unitary or Normal Operators -- Answers -- 4 Positive Operators -- 4.1 Basics -- 4.2 Questions.
 4.2.1 Two Positive Operators A, B Such That $AB=0$ -- 4.2.2 Two A, B Such That $A \geq 0, B \geq 0,$ yet $AB \neq 0$ -- 4.2.3 $KA \leq A$ Where $A \geq 0$ and K Is a Contraction -- 4.2.4 $KA \leq A$ $KA=KA$ Where $A \geq 0$ and K Is an Isometry -- 4.2.5 $KA \leq A$ $KA^*=KA$ Where $A \geq 0$ and K Is Unitary -- 4.2.6 The Operator Norm Is Not Strictly Increasing -- 4.2.7 $AB \leq A^2, B \leq B^2$ -- 4.2.8 $A, B \geq 0, AB+BA \leq A^2+B^2$ -- 4.2.9 Two Non-self-adjoint A and B Such That $A^n+B^n \geq 0$ for All n -- 4.2.10 Two Positive A, B (with $A \geq 0$ and $B \geq 0$) and Such That $AB \neq 0$ but A^2+B^2 Is Not Invertible -- 4.2.11 Two A, B Satisfying $\|AB-BA\| = \frac{1}{2}\|A^2-B^2\|$ -- 4.2.12 Two A, B Satisfying $\|AB-BA\| = \|A^2-B^2\|$ -- 4.2.13 On Normal Solutions of the Equations $AA^*=qA^*A, qR$ -- Answers -- 5 Matrices of Bounded Operators -- 5.1 Basics -- 5.2 Questions -- 5.2.1 A Non-invertible Matrix Whose Formal Determinant Is Invertible -- 5.2.2 An Invertible Matrix Whose Formal Determinant Is Not Invertible -- 5.2.3 Invertible Triangular Matrix vs. Left and Right Invertibility of Its Diagonal Elements -- 5.2.4 Non-invertible Triangular Matrix vs. Left and Right Invertibility of Its Diagonal Elements -- 5.2.5 An Invertible Matrix yet None of Its Entries Is Invertible -- 5.2.6 A Normal Matrix yet None of Its Entries Is Normal -- 5.2.7 A Unitary Matrix yet None of Its Entries Is Unitary -- 5.2.8 Two Non-comparable

Self-Adjoint Matrices yet the Corresponding Entries Are Comparable --
 5.2.9 An Isometry S Such That S^2 Is Unitarily Equivalent to SS -- 5.2.10
 An Infinite Direct Sum of Invertible Operators Need Not Be Invertible --
 5.2.11 The Similarity of AB to CD Does Not Entail the Similarity of A to
 C or That of B to D -- 5.2.12 A Matrix of Operators T on H^2 Such That
 $T^3=0$ But $T^2 \neq 0$ -- 5.2.13 Block Circulant Matrices Are Not Necessarily
 Circulant -- Answers -- 6 (Square) Roots of Bounded Operators.
 6.1 Basics -- 6.2 Questions -- 6.2.1 A Self-Adjoint Operator with an
 Infinitude of Self-Adjoint Square Roots -- 6.2.2 An Operator Without
 Any Square Root -- 6.2.3 A Nilpotent Operator with Infinitely Many
 Square Roots -- 6.2.4 An Operator Having a Cube Root but Without Any
 Square Root -- 6.2.5 An Operator Having a Square Root but Without
 Any Cube Root -- 6.2.6 A Non-invertible Operator with Infinitely Many
 Square Roots -- 6.2.7 An Operator A Without Any Square Root, but
 $A+I$ Always Has One (C^*) -- 6.2.8 $A^2 \neq 0$ Even When A Is Normal
 -- 6.2.9 $A^3 \neq 0$ Even When A Is Normal -- 6.2.10 An Operator
 Having Only Two Square Roots -- 6.2.11 Can an Operator Have Only
 One Square Root? -- 6.2.12 Can an Operator Have Only Two Cube
 Roots? -- 6.2.13 A Rootless Operator -- 6.2.14 On Some Result By B.
 Yood on Rootless Matrices -- 6.2.15 A Non-nilpotent Rootless Matrix
 -- 6.2.16 Two (Self-Adjoint) Square Roots of a Self-Adjoint Operator
 Need Not Commute -- 6.2.17 A $BB(H)$ Commuting with A Need Not
 Commute with an Arbitrary Root of A -- 6.2.18 A Self-Adjoint Operator
 Without Any Positive Square Root -- 6.2.19 Three Positive Operators $A,$
 $B, C \in B(H)$ Such That $AB \neq 0$ and C Is Invertible Yet $(CA^2C)^{1/2}(CB^2C)^{1/2}$
 -- 6.2.20 Three Positive Operators $A, B, C \in B(H)$ Such That AC and BC
 Yet $(A^2+B^2)^{1/2} \neq C$ -- 6.2.21 On Some Result by F. Kittaneh on
 Normal Square Roots -- 6.2.22 On the Normality of Roots of Normal
 Operators Having Co-prime Powers -- 6.2.23 An Isometry Without
 Square or Cube Roots -- 6.2.24 Two Operators A and B Without Square
 Roots, Yet AB Has a Square Root -- Answers -- 7 Absolute Value, Polar
 Decomposition -- 7.1 Basics -- 7.2 Questions -- 7.2.1 An A Such That
 $|\operatorname{Re} A| \leq |A|$ and $|\operatorname{Im} A| \leq |A|$ -- 7.2.2 A
 Weakly Normal T Such That T^2 Is Not Normal -- 7.2.3 Two Self-
 Adjoints A, B Such That $|A+B| \leq |A|+|B|$.
 7.2.4 Two Self-Adjoint Operators A, B That Do Not Satisfy
 $|A||B|+|B||A| \leq |AB+BA|$ -- 7.2.5 Two Self-Adjoint Operators A and B
 Such That $|A|-|B| \leq |A-B| \leq |A|+|B|$ -- 7.2.6 Two Non-commuting Operators A and B That Are Not Normal and
 Yet $|A+B| = |A|+|B|$ -- 7.2.7 Two Positive Operators A and B with $|A-$
 $B| \leq |A+B|$ -- 7.2.8 Two Self-adjoint Operators A and B Such That $|I+|AB-$
 $I|| \leq (|I+|A-I||)(|I+|B-I||)$ -- 7.2.9 Two Self-Adjoints $A, B \in B(H)$ Such That
 $|AB| \leq |A||B|$ -- 7.2.10 Two Operators A and B Such That $AB=BA,$
 However, $|A||B| \leq |B||A|$ -- 7.2.11 A Pair of Operators A and B Such That
 $|A||B| = |B||A|$ and $|B||A| = |A||B|$, But $ABBA$ and AB^*B^*A -- 7.2.12 An
 Operator A Such That $|A||A| \leq |A|$ -- 7.2.13 An A Such That
 $|A||A^*| = |A^*||A|$ But AA^*A^*A -- 7.2.14 An Operator A Such That
 $|A^2| \leq |A|^2$ -- 7.2.15 A Non-surjective A Such That $|A|$ Is Surjective --
 7.2.16 Two Self-Adjoint Operators A, B with $B \neq 0$ Such That $|BAB| \leq$
 $|A||B|$ -- 7.2.17 The Failure of the Inequality $|\operatorname{Re} Ax, x| \leq |\operatorname{Im} Ax, x|$
 $|\operatorname{Re} Ax, x| \leq |\operatorname{Im} Ax, x|$ -- 7.2.18 On the Generalized Cauchy-
 Schwarz Inequality -- 7.2.19 On the Failure of Some Variants of the
 Generalized Cauchy-Schwarz Inequality -- 7.2.20 A Sequence of Self-
 Adjoint Operators (A_n) Such That $\sum_{n=1}^{\infty} |A_n| \leq 0$ But
 $\sum_{n=1}^{\infty} A_n \neq 0$ -- 7.2.21 The Non-weakly Continuity of
 $|A|$ -- 7.2.22 A Sequence of Operators (A_n) Converging Strongly to $A,$
 but $(|A_n|)$ Does Not Converge Strongly to $|A|$ -- 7.2.23 An Invertible
 $A=U|A|$ with $U|A||A|U, UAAU,$ and $A|A||A|A$ -- 7.2.24 Left or Right

Invertible Operators Do Not Enjoy a ("Unitary") Polar Decomposition
-- 7.2.25 A Normal Operator Whose Polar Decomposition Is Not Unique
-- 7.2.26 On a Result of the Uniqueness of the Polar Decomposition By
Ichinose-Iwashita -- 7.2.27 An Operator A Expressed as $A=V|A|$ with
 $A^3=0$ but $V^3 \neq 0$ -- 7.2.28 An Invertible Operator A Expressed as
 $A=U|A|$ with $A^3=I$ but $U^3 \neq I$ -- Answers.
8 Spectrum.
