

1. Record Nr.	UNINA9910568270403321
Titolo	Advances in Microbiology, Infectious Diseases and Public Health : Volume 16 // edited by Gianfranco Donelli
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	9783031019951 9783031019944
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (143 pages)
Collana	Advances in Microbiology, Infectious Diseases and Public Health, , 2365-2683 ; ; 1369
Disciplina	616.92
Soggetti	Medical microbiology Biofilms Microbial populations Microbiology - Technique Medical Microbiology Microbial Communities Microbiology Techniques Microbiologia mèdica Salut pública Malalties infeccioses Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Personalized nutrition for microbiota correction and metabolism restore in type 2 diabetes mellitus patients -- Beyond Bone: Infectious diseases and immunity in parathyroid disorders -- In vitro antimicrobial susceptibility testing of biofilm-growing bacteria: current and emerging methods -- Antibiofilm Efficacy of Polihexanide, Octenidine and Sodium Hypochlorite/Hypochlorous Acid Based Wound Irrigation Solutions against Staphylococcus aureus, Pseudomonas aeruginosa and a Multispecies Biofilm -- Molecular Characterization of Extended-Spectrum Beta-Lactamase-Producing Enterobacteriaceae Isolates Collected from Inanimate Hospital Environments in Addis

Ababa, Ethiopia -- Distribution and Antibiotics Resistance Pattern of Community-Acquired Methicillin-Resistance Staphylococcus aureus in Southwestern Nigeria -- Ultrastructural and Immunohistochemical Diagnosis of a Neonatal Herpes Simplex Virus Infection Presenting as Fulminant Hepatitis: A Case Report -- Antimicrobial Activity of Xibornol and a Xibornol-Based Formulation Against Gram-Positive Pathogens of the Respiratory Tract -- Achille Sclavo (1861-1930) and his innovative contributions to Italian preventive medicine and healthcare policy -- The magnitude of Carbapenemase and ESBL producing Enterobacteriaceae isolates from patients with Urinary Tract Infections at Tikur Anbessa Specialized Teaching Hospital, Addis Ababa, Ethiopia.

Sommario/riassunto

This book series focuses on current progress in the broad field of medical microbiology, and covers both basic and applied topics related to the study of microbes, their interactions with human and animals, and emerging issues relevant for public health. Original research and review articles present and discuss multidisciplinary findings and developments on various aspects of microbiology, infectious diseases, and their diagnosis, treatment and prevention. The book series publishes review and original research contributions, short reports as well as guest edited thematic book volumes. All contributions will be published online first and collected in book volumes. There are no publication costs. Advances in Microbiology, Infectious Diseases and Public Health is a subseries of Advances in Experimental Medicine and Biology, which has been publishing significant contributions in the field for over 30 years and is indexed in Medline, Scopus, EMBASE, BIOSIS, Biological Abstracts, CSA, Biological Sciences and Living Resources (ASFA-1), and Biological Sciences. 2020 Impact Factor: 2.622. 5 Year Impact Factor: 3.049; Cite Score: 3.9; Eigenfactor Score: 0.03583; Article Influence Score: 0.602.
