   Disciplina   343.0999

   Soggetti   Artificial intelligence - Law and legislation
                    Artificial intelligence - Research

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto   The Advent of AI and Its Present and Future Application -- AIs Impact
                    on the Society and Human Behavior -- New Issues Raised by AI -- AIs
                    Implication for International Law -- Specific Issues under International
                    Law -- Legal Vacuum to Regulate AI.

   Sommario/riassunto   "This book examines the timely issue of artificial intelligence (AI) and
                    law. At this moment, AI is rapidly developing and being utilized in
                    many different sectors. Meanwhile, the rise of AI raises complex
                    questions and poses new challengesnew products and services
                    involving AI will require new regulations and standards to minimize
                    potential negative side-effects and maximize the benefits of this new
                    technology, both within domestic law and international law. Thus, this
                    book focuses on the impact of AI on international law and seeks ways
                    to develop international law frameworks to adequately address the
                    challenges of the AI era. In this context, new forms of inter-state
                    conflicts and emergence of new subjects and objects of international
                    law are discussed along with relevant up-to-date developments in
                    major jurisdictions. Issues arising from the advent of AI relating to
                    state sovereignty, state responsibility, dispute settlements, and north-
                    south divide are also considered"--Publisher's description.
