Disciplina	616.07572076
Soggetti	Radiology
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The Master in Interventional Pulmonology aims at training a versatile pulmonologist, with professional skills in diagnostic and operative bronchoscopy, thoracoscopy and artificial respiratory tracts management with the synergistic contribution of university and hospital teachers. Every year, several specialists from all over the national territory take part to the Master. This work is a collection of all the dissertations presented by the attendants of the eighth edition of the Master in Interventional Pulmonology of the academic year 2016/2017, and acts as evidence and worthy conclusion for a demanding but fruitful year of study and practical activities aimed at certifying professional competence, which can be useful and expendable in the curriculum of a pulmonologist.
