

1. Record Nr.	UNINA9910571705503321
Autore	BRUNI Riccardo
Titolo	Dialogare: compendio di logica
Pubbl/distr/stampa	Florence, : Firenze University Press, 2017
Descrizione fisica	1 electronic resource (194 p.)
Collana	Strumenti per la didattica e la ricerca
Soggetti	Philosophy: logic Occupational & industrial psychology Teaching of specific groups & persons with special educational needs Mathematical foundations Philosophy of science
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>“Logic”, as understood in this volume, is the set of knowledge at the basis of man’s reasoning faculties: understanding, analysing, arguing. The text presents a review of topics which are useful to strengthen the skills related to reasoning faculties through a brief introduction to the theoretical aspects and exercises intended to assess the understanding. The volume is divided into parts, which are organised in teaching units. The parts and units are presented in such a way that, following the thread in the order in which they are proposed, we move from one topic to the next, acquiring the prerequisites necessary for to what comes after. The text therefore lends itself to a “systematic” use, aimed at an extensive study. However, nothing prevents the reader from adapting the material to other needs, choosing only a few topics that they consider useful to integrate their knowledge, to do a “review” or to further practice on already known topics.</p>
