Soggetti	History: earliest times to present day
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The articles collected in the book offer insights on major aspects that determined the success and development of the "ius commune", progressively spread out across Europe, and from Europe to those parts of the world that felt the influence. Three prospects are hereby taken onto account, in a time span of seven centuries (XII-XVIII): the consilia of Jurists, the training paths in universities (texts, literary genres, doctrines, teaching and teachers) and the canonical science.
