	Titolo	Models and analysis of vocal emissions for biomedical applications : 12th international workshop : December 14-16, 2021, Firenze, Italy / / edited by Claudia Manfredi
	Pubbl/distr/stampa	Firenze : , : Firenze University Press, , [2021] ©2021
	Descrizione fisica	1 online resource (184 pages) : illustrations
	Collana	Proceedings e report
	Disciplina	616.855
	Soggetti	Voice disorders
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Sommario/riassunto	The International Workshop on Models and Analysis of Vocal Emissions for Biomedical Applications (MAVEBA) came into being in 1999 from the particularly felt need of sharing know-how, objectives and results between areas that until then seemed quite distinct such as bioengineering, medicine and singing. MAVEBA deals with all aspects concerning the study of the human voice with applications ranging from the newborn to the adult and elderly. Over the years the initial issues have grown and spread also in other fields of research such as occupational voice disorders, neurology, rehabilitation, image and video analysis. MAVEBA takes place every two years in Firenze, Italy. This edition celebrates twenty-two years of uninterrupted and successful research in the field of voice analysis.
