

1. Record Nr.	UNINA9910571779003321
Autore	Ricciardelli Francesco
Titolo	WINDERFUL Wind and INfrastructures : Dominating Eolian Risk For Utilities and Lifelines // Francesco Ricciardelli, Vincenzo Sepe, Gianni Bartoli
Pubbl/distr/stampa	Firenze : , : Firenze University Press, , 2004
Descrizione fisica	1 online resource (202 pages)
Collana	Proceedings e report
Disciplina	624.175
Soggetti	Buildings - Aerodynamics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	WINDERFUL (an acronym for Wind and INfrastructures: Dominating Eolian Risk For Utilities and Lifelines) is the title of a research project carried out by eight Italian Universities from the end of 2001 to the end of 2003. The project was centred on how "to keep a city running and ensuring quality services during and after major windstorms", avoiding "major failures" of engineering facilities and main infrastructures. The book reports the main results obtained in the project, and for each typology the tool for assessing its reliability are discussed, together with the criteria for its improvement.
