Titolo	Climate Change Impacts on Agriculture in Europe : Final Report of COST Action 734 'Impact of climate change and variability on European agriculture' // Edited by Pavol Nejedlik, Simone Orlandini
Pubbl/distr/stampa	Firenze : , : Firenze University Press, , 2012 ©2012
Descrizione fisica	1 online resource (206 pages)
Collana	Proceedings e report
Disciplina	363.73874
Soggetti	Climatic changes - United States
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	COST Action 734 was launched thanks to the coordinated activity of 29 EU countries. The main objective of the Action was the evaluation of impacts from climate change and variability on agriculture for various European areas. Secondary objectives were: collection and review of existing agroclimatic indices and simulation models, to assess hazard impacts on European agricultural areas; to apply climate scenarios for the next few decades; the definition of harmonised criteria to evaluate the impacts of climate change and variability on agriculture; the definition of warning systems guidelines. Based on the result, possible actions (specific recommendations, suggestions, warning systems) were elaborated and proposed to the end-users, depending on their needs.
