

1. Record Nr.	UNINA9910573098703321
Titolo	The science of reading : a handbook // edited by Margaret J. Snowling, Charles Hulme, Kate Nation
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley-Blackwell, , [2022] ©2022
ISBN	1-119-70511-8 1-119-70512-6 1-119-70513-4
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (605 pages)
Collana	Wiley Blackwell Handbooks of Developmental Psychology Ser.
Disciplina	428.4
Soggetti	Reading
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- List of Contributors -- Preface -- Acknowledgments -- Part 1 Word Recognition -- Chapter 1 Progress in Reading Science: Word Identification, Comprehension, and Universal Perspectives -- Reading and Reading Science in Historical Context -- Advance 1: The Word-identification System in Skilled Alphabetic Reading -- Visual processing and models of eye movements -- Orthographic processing and models of word identification -- Advance 2. Comprehending while Reading -- From global top-down structures to actual comprehension -- Text comprehension from the bottom up -- The situation model: Knowledge and inferences -- Advance 3. Toward a More Universal Science of Reading -- The brain's reading network (revisited) -- Disruptions in the word-identification system (revisited) -- Concluding Reflections: Learning to Read and Reading Pedagogy -- The experience-based shift in word reading -- Teaching reading -- A final reflection -- References -- Chapter 2 Models of Word Reading: What Have We Learned? -- Reading Aloud: Accounting for Basic Phenomena -- Simulations of Behavioral Studies: What Did They Show? -- Regularity effects -- Consistency effects -- Nonword Pronunciation -- Nonword consistency effects -- Relative difficulty of words and nonwords -- Length effects for words versus nonwords -- Semantic effects on word naming --

Summary -- Hybrid Models -- Learning to Read -- Conclusions --
 Acknowledgments -- References -- Chapter 3 Word Recognition I:
 Visual and Orthographic Processing -- Letter-Based Word Recognition
 -- Letter perception -- Identifying letters in letter strings -- Letter
 positions -- Orthographic Processing and Word Recognition -- Visual
 factors -- Encoding letter-order for word identification -- Letter
 location versus letter order.
 Effects of the number and frequency of orthographically similar words
 -- Bridging the Gap with Sentence Reading -- Conclusions --
 Acknowledgments -- References -- Chapter 4 Word Recognition I:
 Visual and Orthographic Processing: Word Recognition II: Phonological
 Coding in Reading -- Evidence that Phonology Is Involved in Silent
 Reading -- Reading without phonology? -- Phonology Activation:
 Addressed or Assembled? -- Phonology in words with inconsistent
 mappings -- Is there need for an orthographic code in visual word
 recognition? -- Computational Models of Visual Word Recognition --
 The Dual Route Cascaded (DRC) model -- The CDP+ model -- Triangle
 model -- Phonology, Reading, and Neuroscientific Findings --
 Conclusions -- References -- Chapter 5 Word Recognition III:
 Morphological Processing -- Morphemes as "Islands of Regularity" --
 Morphological Analysis in Skilled Reading -- Morpheme frequency
 effects -- Morpheme interference effects -- Morphological priming
 effects -- Theoretical Accounts of Morphological Processing --
 Mechanisms for Acquiring Morphological Knowledge -- Conclusions
 and Emerging Questions -- References -- Part 2 Learning to Read and
 Spell -- Chapter 6 The Foundations of Literacy -- Precursors to Literacy
 -- Language Input -- The Home Literacy Environment -- Shared book
 reading -- Parental scaffolding of print knowledge -- The Limiting
 Environment -- Socioeconomic status (SES) -- Family beliefs
 and expectations -- Family risk of dyslexia -- Complex Linguistic
 Contexts -- Summary and Conclusions -- References -- Chapter 7
 Learning to Read Words -- What Needs to Be Learned for Skilled Word
 Reading? -- Sublexical-Level Learning -- Learning about letters --
 Mapping sublexical orthographic units onto sounds -- Lexical-Level
 Learning -- Commencing lexical-level learning: The self-teaching
 hypothesis.
 Building lexical-level learning through experience -- Experience of the
 orthographic context -- Experience of the semantic context --
 Morphology: Connecting print and meaning -- Interactions between
 Sublexical and Lexical Learning -- Interactive processes in a self-
 teaching context -- Interactive processes prior to first exposure:
 Orthographic skeletons -- Conclusions and Future Directions --
 Acknowledgments -- References -- Chapter 8 Learning to Spell Words
 -- Writing Systems -- Elements of Children's Spelling Development --
 Prephonological writing -- Phonological writing -- Beyond Simple
 Phonological Patterns -- Word position and surrounding letters --
 Morphology and etymology -- Children's Spelling in the Digital Age --
 Theories of Spelling Development -- Spelling and Developmental
 Disabilities -- Implications for Instruction -- Future Directions --
 References -- Chapter 9 Individual Differences in Learning
 to Read Words -- Methodological Approaches -- Concurrent Prediction
 -- Longitudinal analyses -- Causal modeling -- Explanatory Item
 Response Models (EIRMs) -- Child- and Word-Level Predictors
 of Individual Differences -- Child-level predictors -- Set for variability
 -- Statistical learning -- Visual attention span -- Text crowding --
 Print exposure -- Reliance on alternative pathways -- Word-Level
 Predictors -- Semantic predictors -- Word consistency/transparency --
 Context-dependent word effects -- Child-by-Word Predictors --

Grapheme-phoneme knowledge -- Word familiarity -- Orthographic choice -- Conclusions -- Acknowledgments -- References -- Chapter 10 Teaching Children to Read -- How Best to Teach Decoding in Whole-Class Settings? -- The challenges of whole-class delivery -- Professional development for teachers -- Issues of implementation -- Theoretically motivated approaches to teaching of reading. A summary of effective evidence-based whole-class teaching -- Teaching Children with Reading Difficulties -- How best to teach decoding skills to children with dyslexia? -- How important is the content and intensity of programs? -- Promoting phoneme awareness and lexical strategies -- Teaching about morphemes -- A summary of effective evidence-based teaching for dyslexia -- Teaching oral language and listening comprehension -- A summary of effective evidence-based teaching for language comprehension -- Conclusions -- References -- Part 3 Reading Comprehension -- Chapter 11 Reading Comprehension I: Discourse -- A Brief History of Models of Discourse Comprehension -- Inferences and the construction of meaning -- Combining online processes and offline representations -- From single text to multiple texts -- A Comprehensive Model of Discourse Comprehension -- The role and nature of inferential processes -- Standards of coherence: Readers' criteria for comprehension -- Current Research Issues -- Validation -- Standards of coherence -- Updating the emerging representation -- Coherence across multiple texts -- Reading in digital contexts -- The relation between text comprehension and the processing of words and sentences -- Concluding Remarks -- References -- Chapter 12 Reading Comprehension II: Sentence Processing -- Eye Movements and Reading -- Computational models of eye movement control during sentence comprehension -- Factors influencing word identification during reading -- Beyond individual words: Computation of dependencies between words -- Children's sentence comprehension: A developmental perspective -- Conclusions -- Acknowledgments -- References -- Chapter 13 Modeling the Development of Reading Comprehension -- Theoretical Foundations for Reading Comprehension Development. Understanding the Development of Reading Comprehension - Methodological Considerations -- Understanding the Development of Reading Comprehension - What Do We Know? -- Is the Simple View of Reading Too Simple? -- Reading fluency - a bridge between decoding and comprehension? -- Inference skills -- Morphology -- Executive functioning -- Working memory -- Metacognitive strategies and comprehension monitoring -- Motivation -- The Simple View of Reading - Simple but Complex -- Relationships between Longitudinal Studies and Theories of Reading Development -- Future Directions -- References -- Chapter 14 Children's Reading Comprehension Difficulties -- A Framework for the Study of Reading Comprehension Difficulties -- Identification and Prevalence of Poor Comprehenders -- The Identification of Poor Comprehenders: Variation in Selection and Group Matching -- The Measurement of Reading Comprehension: The Nature and Effect of Differences among (Standardized) Assessments -- Sources of Reading Comprehension Difficulty -- Word-identification knowledge and processes -- Oral language knowledge -- Higher-level language processes -- Executive functions, working memory, and attentional resources -- General knowledge -- The Dynamics of Language and Literacy Development over Time -- Conclusions and Future Directions -- References -- Part 4 Reading in Different Languages -- Chapter 15 Reading and Reading Disorders in Alphabetic Orthographies -- Characteristics of Alphabetic

Orthographies -- The Alphabetic Principle -- Complexity. --
Consistency. -- Models of Word Reading -- Skilled Word Reading
in Alphabetic Orthographies -- Individual differences in word reading
in adults -- Summary -- Reading Development in Alphabetic
Orthographies -- Cross-linguistic differences in the development
of word-level skills -- The triple foundation of word reading
and spelling skills.
Predictors of word-level literacy skills across alphabetic orthographies.
