

1. Record Nr.	UNINA9910573100203321
Titolo	Research co-production in healthcare // edited by Ian D. Graham, [and three others]
Pubbl/distr/stampa	Chichester, West Sussex, England ; ; Hoboken, New Jersey : , : Wiley-Blackwell, , [2022] ©2022
ISBN	9781119757269 9781119757245 9781119757252 1-119-75726-6 1-119-75724-X 9781119757238
Descrizione fisica	1 online resource (338 pages)
Disciplina	610.724
Soggetti	Biology - Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"Research coproduction is an approach to health research that involves working collaboratively with knowledge-users as partners in the research process. It allows multiple perspectives to influence the research question and approach so that it better reflects the needs of those using the knowledge in practice. Decision-making is shared by researchers and knowledge-users throughout the research process. By linking knowledge and practice at the research stage, bilateral or multilateral exchange of expertise leads to more relevant, feasible, and used research findings, and improved dissemination and impact via networks created with the knowledge-users. This introductory chapter defines research coproduction, inclusive of divergent conceptualizations of how stakeholders and knowledge-users are defined and engaged and explores similar collaborative research approaches that have informed the way coproduction is approached and understood. The potential benefits, relevance, and conduct of

research coproduction are introduced and sets an initial understanding to explore the various foundations, applications, and processes in the following chapters of this book"--
