

1. Record Nr.	UNINA9910450792703321
Autore	Hoffmann Sebastian
Titolo	Grammaticalization and English complex prepositions [[electronic resource]] : a corpus-based study // Sebastian Hoffmann
Pubbl/distr/stampa	New York ; ; London, : Routledge, 2005
ISBN	1-134-23727-8 1-281-15804-6 9786611158040 0-203-00822-7
Descrizione fisica	1 online resource (230 p.)
Collana	Routledge advances in corpus linguistics ; ; 7
Disciplina	425/.7
Soggetti	English language - Prepositional phrases English language - Discourse analysis English language - Grammaticalization English language - Prepositions Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [199]-208) and indexes.
Nota di contenuto	Half Title: Grammaticalization and English Complex Prepositions; Title Page; Copyright; Dedication; Contents; Figures; Tables; Acknowledgements; Abbreviations; 1 Introduction; 2 Data collection and research methodology; 3 Complex prepositions; 4 Grammaticalization and complex prepositions; 5 Complex prepositions; 6 Complex prepositions in Present-day English; 7 In terms of A new discourse marker; 8 Are low-frequency complex prepositions grammaticalized?; 9 Conclusion; Appendix I; Appendix II; Notes; Bibliography; Author index; Subject index
Sommario/riassunto	What is a grammatical unit? How does grammatical structure evolve? How can we best investigate the mental representation of grammar? What is the connection between language use and language structure? This book aims to help answer such questions by presenting a detailed analysis of English complex prepositions (e.g. in spite of or with respect to) on the basis of large amounts of authentic language data dating from the Middle Ages until today.

Autore	Sakagami Hiroshi
Titolo	Research Topics in Medicines and How Our Board Members Are Engaged in Them
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (480 p.)
Soggetti	Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>With the development of analytical instruments, the academic system has become more complicated, producing new journals one after another. Therefore, it became much important to clarify what is original of "Medicines". As the name Medicines indicates, it includes science and practice of caring for a patient and managing the diagnosis, prognosis, prevention, treatment or palliation of their injury or disease. Therefore, Medicines differs from other journals with similar title in that it covers a wide range of fields, from traditional medicine to rapidly developing molecular-targeted drugs, focusing on their pharmacological effects, structure-activity relationships, metabolic pathways, gene expression, using cultured cells, animals, and clinical trials. Most parts of this Special Issue were written by our editorial board members, who described the research topics and how they are engaged in their field of research. All of these articles are their life-long story. We collected a total number of 22 original works by basic researchers and clinical doctors. We hope that readers can get a chance to know the current</p>

status of diverse fields of medicines, and what your most important research themes are after reading these articles.
