	Autore	Her Majesty's Nautical Almanac Office
	Titolo	Planetary co - ordinates for the years 1960-1980 : referred to the equinox of 1950.0 / prepared by H. M. Nautical Almanac Office ; published by order of the Lords Commissioners of the Admiralty
	Pubbl/distr/stampa	London : Her Majesty's Stationery Office, 1958
	Titolo uniforme	Planetary co - ordinates for the years 1960-1980
	Descrizione fisica	xix, 160 p. : tab. ; 29 cm
	Disciplina	526.61
	Collocazione	S 526.61/10
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910511986003321
	Autore	Singerton Jonathan <1991->
	Titolo	American Revolution and the Habsburg Monarchy // Jonathan Singerton
	Pubbl/distr/stampa	Charlottesville : , : University of Virginia Press, , 2022
	Descrizione fisica	1 online resource (xviii, 366 pages) : illustrations
	Collana	The Revolutionary age
	Disciplina	973.32
	Soggetti	Influence (Literary, artistic, etc.) Public opinion United States Foreign relations 1775-1783
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references and index.

### Sommario/riassunto

"This book presents the American Revolution from the perspective of the Habsburg monarchy. It reveals how, despite seeming antithetical to the American cause, the Habsburg dynasty and people in the Habsburg lands realized the opportunity unleashed by the creation of the thirteen United States of America, demonstrating the wider effects of the American Revolution beyond the standard Atlantic World and portraying the Habsburg Monarchy in a new, oceanic light"--

4. Record Nr.	UNINA9910557108803321
Autore	Paraforos Dimitrios S
Titolo	Sensors Application in Agriculture
Pubbl/distr/stampa	Basel, Switzerland, : MDPI - Multidisciplinary Digital Publishing Institute, 2020
Descrizione fisica	1 online resource (228 p.)
Soggetti	Biology, life sciences Research & information: general Technology, engineering, agriculture
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Novel technologies are playing an important role in the development of crop and livestock farming and have the potential to be the key drivers of sustainable intensification of agricultural systems. In particular, new sensors are now available with reduced dimensions, reduced costs, and increased performances, which can be implemented and integrated in production systems, providing more data and eventually an increase in information. It is of great importance to support the digital transformation, precision agriculture, and smart farming, and to eventually allow a revolution in the way food is produced. In order to exploit these results, authoritative studies from the research world are still needed to support the development and implementation of new solutions and best practices. This Special Issue is aimed at bringing together recent developments related to novel sensors and their proved or potential applications in agriculture.

Autore	Skalkos Dimitris
Titolo	Innovative Agrifood Supply Chain in the Post-COVID 19 Era
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (194 p.)
Soggetti	Biology, life sciences Food & society Research & information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The world is changing rapidly in the age beyond Coronavirus. The current period of deprivation and anxiety, together with the coming global economic crisis, will usher in new consumer attitudes and behaviors that will change the nature of today's capitalism. There are signs today of a growing anti-consuming movement with five types of anti-consumerists: life simplifiers, degrowth activists, climate activists, food choosers, and conservation activists. Citizens will reexamine what they eat, how much they eat, and how all this is influenced by class issues and inequality. Consequently, the food supply chain network will have to change dramatically, adjusting to the new attitudes, perceptions and preferences of the consumers of a post-COVID-19 era. Innovation will play a vital role in modernizing the food supply chain to meet the new challenges of the upcoming global economy. The process "from farm to fork" as the holistic approach to the production and consumption of food will become a key factor for the sustainability and the progress of the food industry. This Special Issue is focused on 11 selected topics from different parts of the agrifood supply chain in view of the post-COVID-19 era expanding from innovative scientific insights and technological advances of natural resources, organic pollutants identification, new food product development, traceability, and packaging, chain management, to consumer's attitudes, and eating</p>

motivations, aiming to tackle the foreseen changes of global economy.
