

1. Record Nr.	UNINA9910578698703321
Autore	Ivanovic Mirjana
Titolo	Handbook on Intelligent Techniques in the Educational Process : Vol 1 Recent Advances and Case Studies // edited by Mirjana Ivanovi, Aleksandra Klačnja-Milievi, Lakhmi C. Jain
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2022
ISBN	9783031046629 3031046625
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (399 pages)
Collana	Learning and Analytics in Intelligent Systems, , 2662-3455 ; ; 29
Disciplina	371.334
Soggetti	Computational intelligence Education Education - Data processing Computational Intelligence Computers and Education
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Chapter 1: Current Trends in AI-based Educational Processes - An Overview -- Chapter 2: Digitalization of Education -- Chapter 3: Remote Teaching and Learning Math in English Through CLIL -- Chapter 4: The Potential of Artificial Intelligence for Assistive Technology in Education.
Sommario/riassunto	Education has a substantial impact and influences on almost all sectors in modern society. Different computer-supported educational systems have been developing for many decades to support and make easier teaching and learning processes on all levels of education. Influences of rapid development of Information Communication Technologies and other related disciplines on design and implementation of intelligent, sophisticated educational systems are evident. Nowadays intensive development and wide applications of Artificial Intelligent techniques significantly affect the development of intelligent tutoring systems, smart learning environments that incorporate virtual and augmented reality and robots. Artificial Intelligence has the potential to address

some of the biggest challenges in education today, but also in the future in order to establish innovative teaching and learning practices facilitated by powerful educational datamining and learning analytics. This book presents a collection of 17 chapters that bring interesting aspects of the state-of-the-art of application of intelligent techniques in different educational processes and settings. We believe that the works presented in the book will be of great interest to readers and that will motivate them to try to enhance presented approaches and propose better and more advanced solutions.
