1.	Record Nr.	UNINA9910580193603321
	Titolo	HiPS '22 : proceedings of the 2nd Workshop on High Performance Serverless Computing : June 30, 2022, Minneapolis, MN, USA / / general chairs, Yadu Babuji [and three others]
	Pubbl/distr/stampa	New York : , : Association for Computing Machinery, , 2022
	Descrizione fisica	1 online resource (36 pages) : illustrations
	Collana	ACM Conferences
	Disciplina	004.6782
	Soggetti	Cloud computing Computer science Distributed data processing Electronic data processing - Distributed processing
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Includes index.
	Sommario/riassunto	It is our pleasure to welcome you to the second workshop on High Performance Serverless Computing (HiPS2022). The recent years have seen growing adoption of serverless computing as a model for computing in the cloud, as well as a model for remote and distributed computing more broadly. The second workshop on High Performance Serverless Computing aims to expand on the ideas discussed in the previous iteration of this workshop and to create a dedicated forum for discussing foundational research in serverless computing in both industry and academia. The workshop brings together these communities to share experiences and advance the state of the art in high-performance serverless computing.
