

1. Record Nr.	UNIORUON00081051
Autore	MAGNUS, Ralph H.
Titolo	Afghanistan : Mullah, Marx, and Mujahid / Ralph H. Magnus, Eden Naby
Pubbl/distr/stampa	Boulder, : Westview, 1998
ISBN	08-653-1513-2
Descrizione fisica	xiii, 274 p. : ill. ; 24 cm
Altri autori (Persone)	NABY, Eden
Disciplina	320.9581 335.4309581
Soggetti	AFGHANISTAN - Politica e governo COMUNISMO - Afghanistan
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910580211903321
Autore	Ling Yifeng
Titolo	Advances in Sustainable Concrete System
Pubbl/distr/stampa	Basel, : MDPI - Multidisciplinary Digital Publishing Institute, 2022
Descrizione fisica	1 online resource (408 p.)
Soggetti	Conservation of buildings and building materials History of engineering and technology Technology: general issues
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>In recent years, the implementation of sustainable concrete systems has been a topic of great interest in the field of construction engineering worldwide, as a result of the large and rapid increase in carbon emissions and environmental problems resulting from traditional concrete production and industry. For example, the uses of supplementary cementitious materials, geopolymers, binder, recycled aggregate and industrial/agricultural wastes in concrete are all approaches to building a sustainable concrete system. However, such materials have inherent flaws due to their variety of sources, and exhibit very different properties compared with traditional concrete. Therefore, they require specific modifications in preprocessing, design, and evaluation before use in concrete. This reprint, entitled "Advances in Sustainable Concrete System", covers a broad range of advanced concrete research in environmentally friendly concretes, cost-effective admixtures, and waste recycling, specifically including the design methods, mechanical properties, durability, microstructure, various models, hydration mechanisms, and practical applications of solid wastes in concrete systems.</p>
