

1. Record Nr.	UNINA9910580296003321
Autore	Maier Georg
Titolo	Bildfolgenbasierte Gewinnung und Nutzung partikelindividueller Bewegungsinformation in der optischen Schuttgutsortierung // Georg Maier
Pubbl/distr/stampa	Karlsruhe, Baden : , : KIT Scientific Publishing, , 2022
Descrizione fisica	1 online resource (246 pages)
Disciplina	025.431
Soggetti	Classification
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Sensor-based sorting enables the separation of individual particles from a material stream. In this work, a novel sorting system using an area-scan camera is investigated. The use of high-speed cameras raises exciting research questions from a computer science perspective regarding the extraction and use of more advanced features, especially motion information about the materials to be sorted.
