	Sommario/riassunto	Wonder, Horror, Mystery is a dialogue between two friends, both notable arts critics, that takes the form of a series of letters about movies and religion. One of the friends, J.M. Tyree, is a film critic, creative writer, and agnostic, while the other, Morgan Meis, is a philosophy PhD, art critic, and practicing Catholic. The question of cinema is raised here in a spirit of friendly friction that binds the personal with the critical and the spiritual. What is film? What's it for? What does it do? Why do we so intensely love or hate films that dare to broach the subjects of the divine and the diabolical? These questions stimulate further thoughts about life, meaning, philosophy, absurdity, friendship, tragedy, humor, death, and God. The letters focus on three filmmakers who challenged secular assumptions in the late 20th century and early 21st century through various modes of cinematic re-enchantment: Terrence Malick, Lars von Trier, and Krzysztof Kieslowski. The book works backwards in time, giving intensive analysis to Malick's To The Wonder (2012), Von Trier's Antichrist (2009), and Kieslowski's Dekalog (1988), respectively, in each of the book's three sections. Meis and Tyree discuss the filmmakers and films as well as related ideas about philosophy, theology, and film theory in an accessible but illuminating way. The discussion ranges from the shamelessly intellectual to the embarrassingly personal. Spoiler alert: No conclusions are reached either about God or the movies. Nonetheless, it is a fun ride.

Nota di contenuto	-- Extracting Tuple-Based Service Demands With Large Language Models for Automated Service Composition. -- Revolutionizing Pharmaceutical Integrity: Using Smart Contracts and NFT Encryption to Safeguard Against Counterfeit Drugs. -- Comparative Analysis of EVM-Supported Blockchain Platforms for Enhancing Organ Donation Supply Chain Management. -- Proof of Stake Verifiers (PoSV) Consensus Mechanisms Implementation in AI Value Protocol (AIVP). -- Blockchain-Based Insurance Claim Management: Implementing RSA-Encrypted NFTs for Secure and Transparent Processing. -- COSIS: An AI-Enabled Digital Transformation Framework Integrating Large Language Models and Key Performance Indicators. -- Exploring Experiential Marketing Strategies of Luxury Fashion Brands in the Metaverse: An In-Depth Analysis of Immersive Consumer Engagement.

Sommario/riassunto   This book constitutes the refereed proceedings of the 21st
                          International Conference on Services Computing – SCC 2024, Held as
                          Part of the Services Conference Federation, SCF 2024, held in Bangkok,
                          Thailand, during November 16-19, 2024. The 7 full papers in this book
                          were carefully reviewed and selected from 13 submissions. They are
                          organized in topical sections as follows: business modeling, business
                          consulting, solution creation, service delivery, and software architecture
                          design, development, and deployment.
