

1. Record Nr.	UNINA9910583007903321
Titolo	Introduction to cancer metastasis // edited by Aamir Ahmad
Pubbl/distr/stampa	Amsterdam, [Netherlands] : , : Academic Press, , 2017 ©2017
ISBN	0-12-804033-5
Descrizione fisica	1 online resource (418 pages) : illustrations, tables
Collana	Cancer Metastasis ; ; Volume 1
Disciplina	616.994072
Soggetti	Metastasis - Diagnosis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	List of contributors -- Preface -- I CANCER METASTASIS FROM PRIMARY ORGANS -- 1 CANCER METASTASIS: AN INTRODUCTION -- 1. Introduction -- 2. Disruption of Cell Adhesion: Initiation of Metastasis -- 3. Matrix Metalloproteinases in Cancer Metastasis -- 4. EMT in Cancer Metastasis -- 5. Organ-Specific Metastasis -- 6. microRNAs and Cancer Stem Cells in Cancer Metastasis -- 7. Conclusions and Perspectives -- 2. BREAST CANCER METASTASIS -- 1. Introduction -- 2. Biology -- 3. Metastatic Dissemination -- 4. Prognostic Factors After Recurrence -- 5. Treatment for Metastatic Breast Cancer -- 6. Conclusions -- 3. PROSTATE CANCER METASTASIS -1. Epidemiology and Overview of Metastatic Prostate Cancer -- 2. Cellular Biology of Prostate Cancer Metastases -- 3. The Metastatic Cascade -- 4. Conclusions -- 4. LUNG CANCER METASTASIS -- 1. General Information -- 2. Mechanism of Metastasis -- 3. Molecular Mechanism in the Regulation of Lung Cancer Metastasis -- 4. Epithelial to Mesenchymal Transition in Lung Cancer -- 5. Cancer Stem Cells -- 6. Concluding Remarks -- 5. CERVICAL CANCER METASTASIS -- 1. Introduction -- 2. Risk Factors -- 3. Pathogenesis -- 4. Histopathology -- 5. Routes of Dissemination -- 6. Major Molecular Factors -- 7. Conclusion -- 6. COLORECTAL CANCER METASTASIS -- 1. Introduction -- 2. Molecular Aspects of Colorectal Cancer Metastasis -- 3. Main Sites of Colorectal Cancer Metastasis -- 4. Therapeutic Options for Metastatic Colorectal Cancer -- 5. Challenges and Probable Solutions -- 6. Conclusions -- 7.

METASTATIC PANCREATIC CANCER: CURRENT STATE AND FUTURE DIRECTIONS -- 1 Introduction -- 2 Management of pancreatic ductal adenocarcinoma -- 3 Molecular mechanisms driving metastasis -- 4 In vivo experimental models -- 5 Open question: onset and dynamics of metastasis -- 6 Conclusions -- 8 GASTRIC CANCER METASTASIS -- 1 Epidemiology and screening programs -- 2 Metastatic GC -- clinical aspects -- 3 Diagnosis of metastatic GC with a particular focus on 18-F-FDG PET/CT -- 4 Prognostic and predictive factors -- 5 Biomarkers -- 6 Treatment methods of metastatic GC -- 7 Conclusion -- 9 HEPATOCELLULAR CARCINOMA: METASTATIC DISEASE -- 1 Introduction -- 2 Epidemiology -- 3 Diagnosis -- 4 Prognosis and staging -- 5 Treatment -- 6 Conclusions -- 10 METASTATIC BLADDER CANCER -- 1 Introduction -- 2 Epidemiology -- 3 Staging -- 4 Grading -- 5 Staging tools -- 6 Emerging biomarkers -- 7 Prognostic factors -- 8 Clinical presentation of metastatic bladder disease -- 9 Management of clinically localized bladder cancer, positive pelvic nodes and metastatic disease -- 10 Clinical prognosticators -- 11 Management of metastatic bladder cancer -- 12 New agents -- 13 Immunotherapy -- 14 Role of surgery in metastatic bladder cancer -- 15 Conclusions -- 11 METASTATIC CUTANEOUS SQUAMOUS CELL CARCINOMAS -- 1 Introduction -- 2 Defining the high-risk variant -- 3 Staging systems -- 4 Treating high-risk cutaneous squamous cell carcinoma -- 5 Sentinel node biopsy -- 6 Treatment of locally advanced or metastatic cutaneous squamous cell carcinoma -- 7 Concluding remarks -- 12 OSTEOSARCOMA METASTASIS-PROGNOSTIC FACTORS AND TREATMENT STRATEGIES -- 1 Introduction -- 2 Clinical features of metastasis from osteosarcoma -- 3 Treatment for metastasis from osteosarcoma -- 4 Conclusion -- II CANCER METASTASIS TO DISTANT ORGANS -- 13 LYMPH NODE METASTASIS -- 1 Introduction -- 2 History -- 3 Mechanisms-how tumors metastasize to lymph nodes -- 4 Clinical aspects of lymph node metastasis -- 5 Pathology -- 6 Conclusions and summary -- 14 MOLECULAR INVOLVEMENT OF THE BONE MARROW MICROENVIRONMENT IN BONE METASTASIS -- 1 Introduction -- 2 Types of bone metastasis -- 3 Pathophysiology of bone metastasis -- 4 Treatment options for bone metastasis -- 5 Discussion/conclusion -- 15 AN OVERVIEW ON HEPATIC METASTASIS -- 1 Introduction -- 2 Hepatic physiology and cancer biology -- 3 Hepatic functional and surgical anatomy -- 4 Clinical presentation and diagnosis -- 5 Treatment of hepatic metastasis -- 6 Conclusions -- 16 PULMONARY METASTASIS -- 1 Development of pulmonary metastasis -- 2 Rationale for local treatment of pulmonary metastases -- 3 Diagnosis of pulmonary metastases -- 4 Preoperative exams -- 5 Surgical resection -- 6 Radiological ablation -- 7 Radiotherapy -- 8 Lymph node involvement -- 9 Resection of recurrent metastases -- 10 Lung metastasis in given tumor types -- 11 Conclusion -- 17 BRAIN METASTASIS: BASIC BIOLOGY, CLINICAL MANAGEMENT, AND INSIGHT FROM EXPERIMENTAL MODEL SYSTEMS -- 1 Introduction -- 2 Biology -- 3 Clinical management -- 4 Experimental model systems -- 5 Preclinical findings -- 6 Conclusions -- III EMERGING TARGETS FOR CANCER METASTASIS -- 18 DEVELOPMENTAL PATHWAYS: EMERGING THERAPEUTIC TARGETS FOR CANCER METASTASIS -- 1 Introduction -- 2 Prometastatic changes and developmental pathways -- 3 Notch signaling and metastasis -- 4 Antimetastatic potential of Wnt and hedgehog targeting -- 5 Concluding remarks -- 19 EMERGING THERAPEUTIC TARGETS FOR CANCER METASTASIS: FROM THE PERSPECTIVE OF EMBRYO IMPLANTATION -- 1 Introduction -- 2 The similarity between embryo implantation and tumor metastasis -- 3 Trophoblast invasion inhibitory factors derived from the maternal

endometrium during embryo implantation and their implications in cancer metastasis -- 4 Conclusions and perspectives -- 20 WNT SIGNALING AS A THERAPEUTIC TARGET IN CANCER AND METASTASIS -- 1 Introduction -- 2 Wnt signaling and cancer -- 3 The role of Wnt signaling in epithelial-mesenchymal transition and cancer stem cells -- 4 Therapeutic strategies targeting Wnt signaling -- 5 Protein knockdown strategies -- 6 Viral-based therapies -- 7 Conclusion -- Index

Sommario/riassunto

"Introduction to Cancer Metastasis provides an overview of cancer metastasis and novel therapeutic targets, all in one place. Through specific chapters on three diverse topics - primary cancers and their metastasis, common metastatic sites and emerging targets for therapy - this volume comprehensively informs readers on the broader knowledge gained on cancer metastasis so far. Key features: Includes basic biology and translational approaches to organ-specific cancer sites; Provides readers with information on emerging therapeutic targets for cancer metastasis; Contains contributions from leading researchers around the globe"--P. [4] of cover.

Sommario/riassunto	On imagine volontiers les ascètes indiens errants et solitaires, notamment les Nath Yogis, ces disciples de Gorakhnath, thaumaturges et adeptes du Hatha Yoga, célèbres depuis le xiii^e siècle pour leurs exploits et, à ce titre, héros de ballades chantées dans toute l'Inde du Nord. Mais, s'ils sont d'infatigables pèlerins, ils possèdent également des modes d'organisation bien établis, en particulier monastiques, grâce auxquels ce mouvement sectaire assure sa pérennité. C'est à ces monastères, point d'ancrage d'une tradition d'itinérance, que ce livre est consacré. Il propose une description et une analyse de la complémentarité de deux types de monastères, les monastères communautaires dans lesquels les ascètes se réunissent autour de symboles et de rites partagés, et les monastères personnels, transmis de maître à disciple au sein d'une lignée. Le monastère de Kadri-Manjunath à Mangalore (Karnataka) est le type même du monastère communautaire : nous verrons que l'intronisation du supérieur y est l'occasion, tous les douze ans, d'une grande célébration, précédée d'un pèlerinage à pied, long de six mois, entre Nasik et Kadri, réitération d'un mythe fondateur lié au dieu Parashuram et illustration de l'histoire religieuse complexe de cette région. Les monastères personnels, ici ceux de Fatehpur dans la Shekhavati (Rajasthan) et de Asthal Bohar en Haryana, sont en revanche le lieu d'innovations, souvent liées à un changement de patronage : un accent mis sur la dimension dévotionnelle derrière le culte du guru et le développement de l'hagiographie, un nouvel intérêt pour les activités caritatives, une ouverture aux laïcs mise en évidence lors de la cérémonie fastueuse tenue à Fatehpur pour leur bénéfice et caractérisée par un sacrifice qui se veut « védique ». Ce livre présente la richesse et la diversité des institutions et des orientations qui concourent, derrière l'atomisation des pratiques individuelles, à faire des Nath Yogis une tradition sectaire vivante et...
