

1. Record Nr.	UNINA9910583311003321
Titolo	Magnetic, ferroelectric, and multiferroic metal oxides // edited by Biljana D. Stojanovic
Pubbl/distr/stampa	Amsterdam, Netherlands : , : Elsevier, , 2018 ©2018
ISBN	0-12-811181-X
Descrizione fisica	1 online resource (618 pages) : illustrations (some color)
Collana	Metal Oxides Series
Disciplina	549.5
Soggetti	Metallic oxides Iron oxides
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Machine generated contents note: ; pt. I Ferroelectric Metal Oxides -- ; Section I Ferroelectrics: Fundamentals -- ; 1. General view of ferroelectrics: Origin of ferroelectricity in metal oxide ferroelectrics and ferroelectric properties / Juras Banys -- ; 1.1. Introduction -- ; 1.2. Macroscopic phenomenological theory of ferroelectric phase transitions -- ; 1.3. Microscopic theory of ferroelectrics: the mean field -- ; 1.4. Dynamic properties of ferroelectrics: theory -- ; 1.5. Raman, infrared, and dielectric spectroscopy of ferroelectrics -- ; 1.6. Other spectroscopic techniques -- ; 1.7. The size and mechanical strain effect in ferroelectric ceramics and thin films -- ; 1.8. Summary -- References -- ; 2. Perovskite and Aurivillius: Types of ferroelectric metal oxides / Jelena D. Bobic -- ; 2.1. Introduction -- ; 2.2. Perovskite structure -- ; 2.3. Aurivillius type of ferroelectric metal oxides -- ; 2.4. Summary -- References -- ; 3. Lead-free perovskite ferroelectrics / Barbara Malic -- ; 3.1. Introduction -- ; 3.2. Alkaline niobates -- ; 3.3. Alkaline bismuth titanates -- ; 3.4. Barium titanate-based piezoelectrics -- ; 3.5. Conclusions -- Acknowledgments -- References -- ; 4. Perovskite layer-structured ferroelectrics / Idalci Cruvinel dos Reis -- ; 4.1. General overview -- ; 4.2. Physical properties -- Acknowledgements -- References -- ; Section II Ferroelectric Metal Oxides: Synthesis and Deposition -- ; 5. Review of methods for powder-based processing /

Jurij Koruza -- ; 5.1. Introduction -- ; 5.2. Solid-state synthesis of ferroelectric perovskites -- ; 5.3. Sintering of ferroelectric bulk ceramics -- ; 5.4. Thick films -- Acknowledgements -- References -- ; 6. Chemical synthesis and epitaxial growth methods for the preparation of ferroelectric ceramics and thin films / Maria A. Zaghete -- ; 6.1. Introduction -- ; 6.2. Chemical synthesis of ferroelectric ceramic powders -- ; 6.3. Epitaxial ferroelectric films: growth methods -- ; 6.4. Conclusion -- Acknowledgments -- References -- ; 7. Nanosized ferroelectrics: Preparation, properties, and applications / Maria A. Zaghete -- ; 7.1. Synthesis of nanostructured ferroelectrics -- ; 7.2. Piezoresponse force microscopy -- ; 7.3. Potential applications of nanosized ferroelectrics -- ; 7.4. Final considerations -- Acknowledgments -- References -- ; 8. Nanosized BaTiO<sub>3</sub>-based systems / Catalina-Andreea Stanciu -- ; 8.1. Fundamentals of undoped BaTiO<sub>3</sub> systems -- ; 8.2. State of the art of nanosized BaTiO<sub>3</sub>-based systems -- ; 8.3. Recent approach to nanosized BaTiO<sub>3</sub>-based systems -- ; 8.4. Conclusions and trends -- Acknowledgements -- References -- ; 9. Ecological, lead-free ferroelectrics / Amador M. Gonzalez -- ; 9.1. Lead-free ferroelectrics -- ; 9.2. Preparation of lead-free piezoelectric ceramics with perovskite structure -- ; 9.3. Properties of lead-free piezoelectric ceramics -- ; 9.4. Future trends in the development of lead-free ferropiezoelectric ceramics -- References -- ; Section III Ferroelectric Metal Oxides Application -- ; 10. Compositionally-graded ferroelectric ceramics and multilayers for electronic and sensing applications / Lucian Pintilie -- ; 10.1. Review of the current situation -- ; 10.2. Recent results -- ; 10.3. Conclusions and trends -- References -- ; 11. Review of the most common relaxor ferroelectrics and their applications / Biljana D. Stojanovic -- ; 11.1. Introduction -- ; 11.2. Lead-based perovskite relaxors -- ; 11.3. Bismuth-layered perovskite relaxors -- References -- Further reading -- ; 12. Tunable ferroelectrics for frequency agile microwave and THz devices / Juan Hinojosa -- ; 12.1. Introduction -- ; 12.2. Techniques for measuring permittivity at microwave frequencies -- ; 12.3. Ferroelectrics at THz frequencies -- References -- ; 13. Piezoelectric energy harvesting device based on quartz as a power generator / Carlos A. Fortulan -- ; 13.1. Introduction -- ; 13.2. Low-power piezoelectric EH generator -- ; 13.3. Process manufacturing and functional experiments of quartz EH -- ; 13.4. Conclusion -- References -- ; 14. Nonvolatile memories / Carlos O. Paiva-Santos -- ; 14.1. Introduction -- ; 14.2. Nonvolatile memory device operation -- ; 14.3. Radio frequency-sputtered CaCu<sub>3</sub>Ti<sub>4</sub>O<sub>12</sub> thin film -- ; 14.4. Spin-coated CaCu<sub>3</sub>Ti<sub>4</sub>O<sub>12</sub> thin films -- References -- ; pt. II Magnetic and Multiferroic Metal Oxides -- ; Section IV Magnetic Oxides: Ferromagnetics, Antiferromagnetics and Ferrimagnetics -- ; 15. Theory of ferrimagnetism and ferrimagnetic metal oxides / Chuanhu Wang -- ; 15.1. Introduction -- ; 15.2. Magnetic fields in materials -- ; 15.3. Magnetisms -- ; 15.4. Ferrites -- ; 15.5. Theoretical aspects of ferrimagnetism -- ; 15.6. Summary -- References -- ; 16. Metal oxide structure, crystal chemistry, and magnetic properties / Srdjan Rakic -- ; 16.1. Magnetic elements/ions -- ; 16.2. Magnetic oxides -- ; 16.3. Magnetism of magnetic oxides -- ; 16.4. Representative structures of magnetic oxides -- References -- ; 17. Review of methods for the preparation of magnetic metal oxides / Nikola I. Ilic -- ; 17.1. Introduction -- ; 17.2. Synthesis of metal magnetic oxides -- ; 17.3. Synthesis of multiferroic materials -- ; 17.4. Summary -- References -- ; 18. Ferrite-based composites for microwave absorbing applications / Chuanhu Wang -- ; 18.1. Introduction -- ; 18.2. Theoretic considerations -- ; 18.3. Barium ferrite composites -- ; 18.4.

Concluding remarks -- References -- ; 19. Soft ferrite applications / Goran Radosavljevic -- ; 19.1. Characterization of ferrite material -- ; 19.2. Passive ferrite components -- ; 19.3. Ferrite sensors -- ; 19.4. Conclusion -- References -- ; 20. Biomedical applications / Dusanka S. Mandic -- ; 20.1. Introduction -- ; 20.2. Biomedical applications of magnetic oxides -- References -- ; Section V Multiferroics: Fundamentals -- ; 21. Ferroelectric perovskite -- spinel ferrite ceramics / Liliana Mitoseriu -- ; 21.1. Introduction -- ; 21.2. Ceramic composites of Nb-doped Pb(Zr, Ti)O<sub>3</sub> with MnFe<sub>2</sub>O<sub>4</sub> -- ; 21.3. Nb-doped Pb(Zr, Ti)O<sub>3</sub>-ferrite composites prepared by in situ sol-gel combustion method -- ; 21.4. Conclusions -- Acknowledgments -- References -- ; 22. Single-phase, composite and laminate multiferroics / Antonio Feteira -- ; 22.1. Introduction -- ; 22.2. Single-phase multiferroics -- ; 22.3. Magnetoelectric multiferroic composites -- ; 22.4. Final remarks -- References -- ; Section VI Multiferroic Metal Oxides: Properties and Applications -- ; 23. Single and heterostructure multiferroic thin films / Antoine Barbier -- ; 23.1. Introduction -- ; 23.2. Elements of thin-film growth: Thin films versus multiferroics -- ; 23.3. Pertinence of multiferroic thin films: Multiferroics versus thin films -- ; 23.4. Conclusion -- References -- ; 24. BiFeO<sub>3</sub> ceramics and thick films: Processing issues and electromechanical properties / Andreja Bencan -- ; 24.1. Processing issues -- ; 24.2. Polarization switching, piezoelectricity, and local electrical conductivity -- Acknowledgments -- References -- ; 25. Properties of single multiferroics: Complex transition metal oxides / Biljana D. Stojanovic -- ; 25.1. Introduction -- ; 25.2. Classification of single multiferroics -- ; 25.3. A-site driven ferroelectricity multiferroics -- ; 25.4. Geometrically driven ferroelectricity multiferroics -- ; 25.5. Charge ordering driven ferroelectricity multiferroics -- ; 25.6. Type I multiferroics with complex or unknown origin of ferroelectricity -- ; 25.7. Magnetically driven ferroelectrics: Type II multiferroics -- ; 25.8. Conclusion -- References -- ; 26. Bulk composite multiferroics: BaTiO<sub>3</sub>-ferrites / Biljana D. Stojanovic -- ; 26.1. Preparation procedures of bulk multiferroics -- ; 26.2. Ferroelectric-dependent electrical properties of the multiferroics -- ; 26.3. Ferrite-dependent magnetic properties of multiferroics -- References -- ; 27. Complex composites: Polymer matrix-ferroics or multiferroics / Mirjana M. Vijatovic Petrovic -- ; 27.1. Summary -- References -- ; 28. Ferroelectric, ferromagnetic, and multiferroic heterostructures for possible applications as tunnel junctions / Ashok Kumar -- ; 28.1. Introduction -- ; 28.2. Ferroelectric nonvolatile memories -- ; 28.3. Ferroelectric tunnel junctions -- ; 28.4. Critical thickness for the existence of ferroelectricity -- ; 28.5. Magnetic tunnel junctions -- ; 28.6. Multiferroic tunnel junctions -- ; 28.7. Multiferroic heterostructure-based tunnel junctions -- ; 28.8. Tunneling electroresistance for the realization of nondestructive ferroelectric polarization readout -- ; 28.9. Advantages of band excitation over single frequency excitation piezoresponse force microscopy -- ; 28.10. Summary and outlook -- References.
